THE MMC® MODEL (MUNICIPAL MATERIAL CYCLE)

THE E-SPACE PROJECT FOR SCHOOLS

THE TOOLBOX FOR THE SALES CHAIN

PROJECTS BEYOND PRODUCTS.

Lucart Professional shows how the forward-thinking vision of an international group is embodied in a truly innovative business model.

The circular economy model of the EcoNatural line, the new recycled paper packaging and the technology that reduces consumption of the Identity line now join the sustainability education projects for schools, as well as the partnerships with municipalities to improve recycling processes.

A commitment to sustainability certified by tangible results and also proven by the Environmental Product Declaration (EPD) on our recycled paper products.

A calling to global innovation that will help you achieve better results in your work and help the world become a better place to live in.

CIRCULAR ECONOMY

COMING FULL CIRCLE WITH SUSTAINABILITY.

The circular economy of the EcoNatural project. A system to turn something no longer needed into a resource.

For the past 10 years, EcoNatural has stood for sustainable innovation.
A project stemming from **advanced technology that recycles 100%** of beverage carton components through a one-of-a-kind manufacturing process in the sector.

Cellulose fibres are used to produce **Fiberpack®**, the raw material employed to make toilet paper, handtowels, handkerchiefs, napkins and rolls for the EcoNatural line. Polyethylene and aluminium are used to produce **Al.Pe®**, which in turn is employed to make paper dispensers, pallets to transport goods and other products.

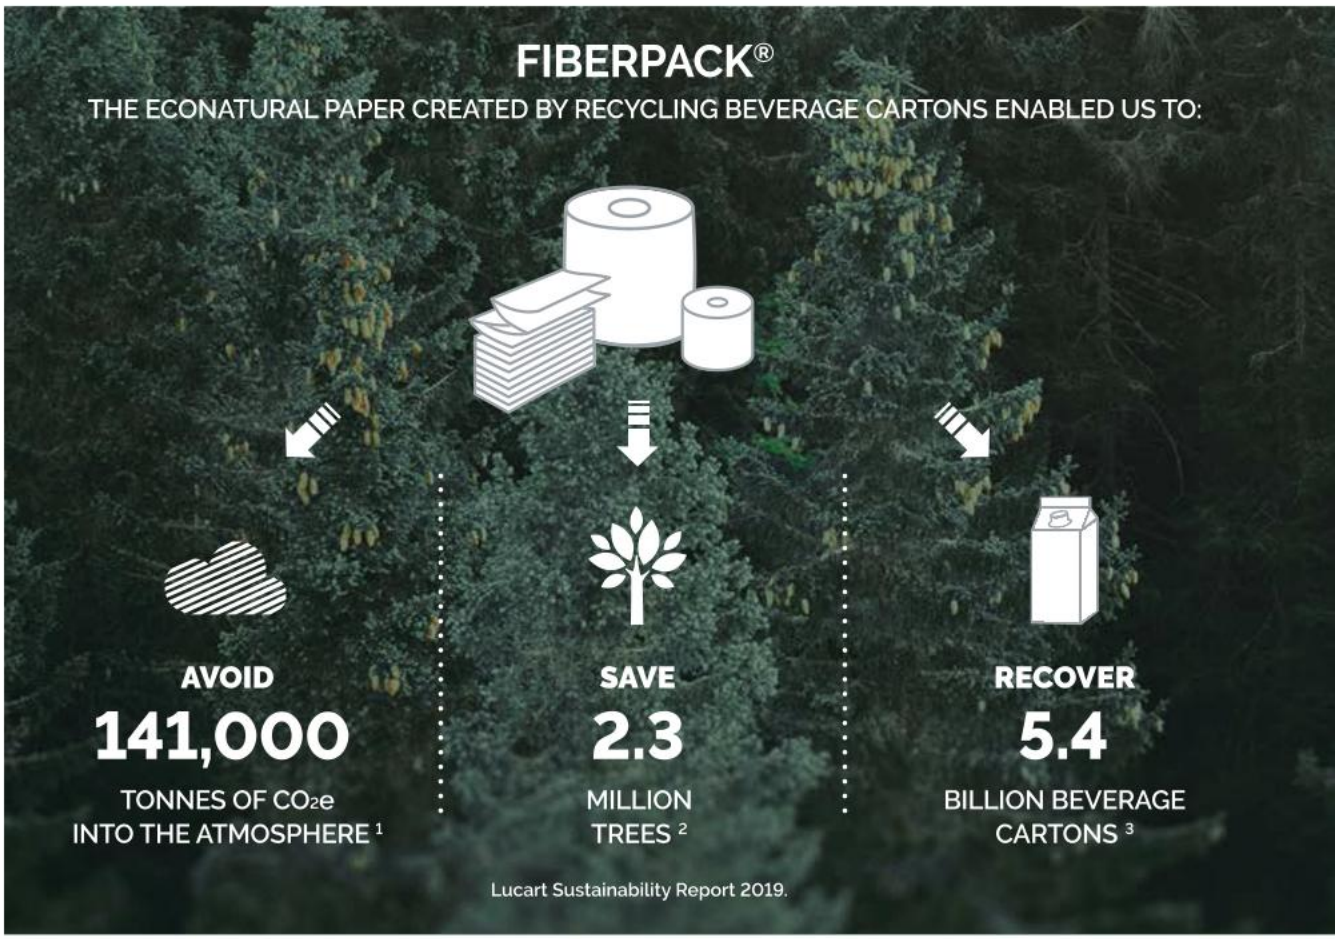

A virtuous system that reduces the burden of waste on the environment and that has allowed Lucart to become a true **circular economy benchmark in Europe**.

THE FIGURES OF SUSTAINABILITY

ADDING UP THE FIGURES FOR THE PLANET, TOO.

Recycle waste, save forests, limit emissions.

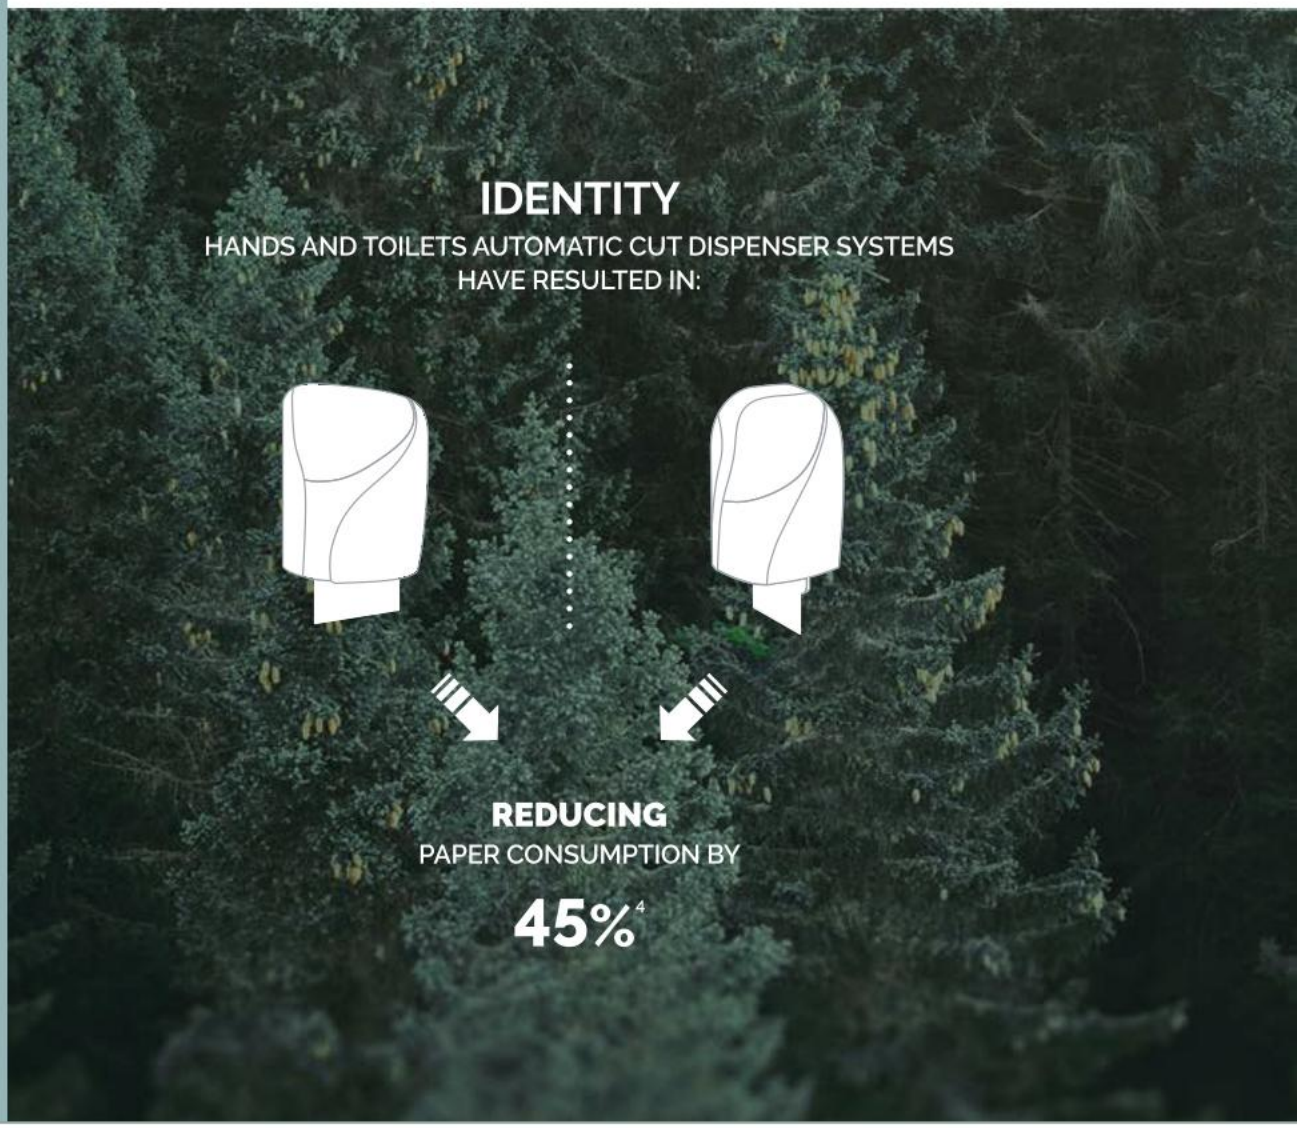

Faced with a selection of sustainable products, today the world expects tangible results for the environment.
EcoNatural project guarantees a tangible and measurable **eco-friendly solution**.
Indeed, considering the tonnes of **Fiberpack®** paper produced, in 2013-2019, Lucart contributed to the **recovery of over 5.4 billion 1L beverage cartons**, covering a distance equal to 31 times the planet's circumference. **It saved more than 2.3 million trees**, for a surface area equivalent to 8,000 football pitches and **avoided CO_2e emissions emitted into the atmosphere exceeding 141,000t**, equal to the emissions of 1,100,015 journeys by car from Paris to Frankfurt.
Plus, in the three years from 2017 to 2019, Lucart Professional recycled the aluminium and polyethylene parts of **4.25 millions** of beverage cartons thanks to the production of **AlPe®** dispensers.

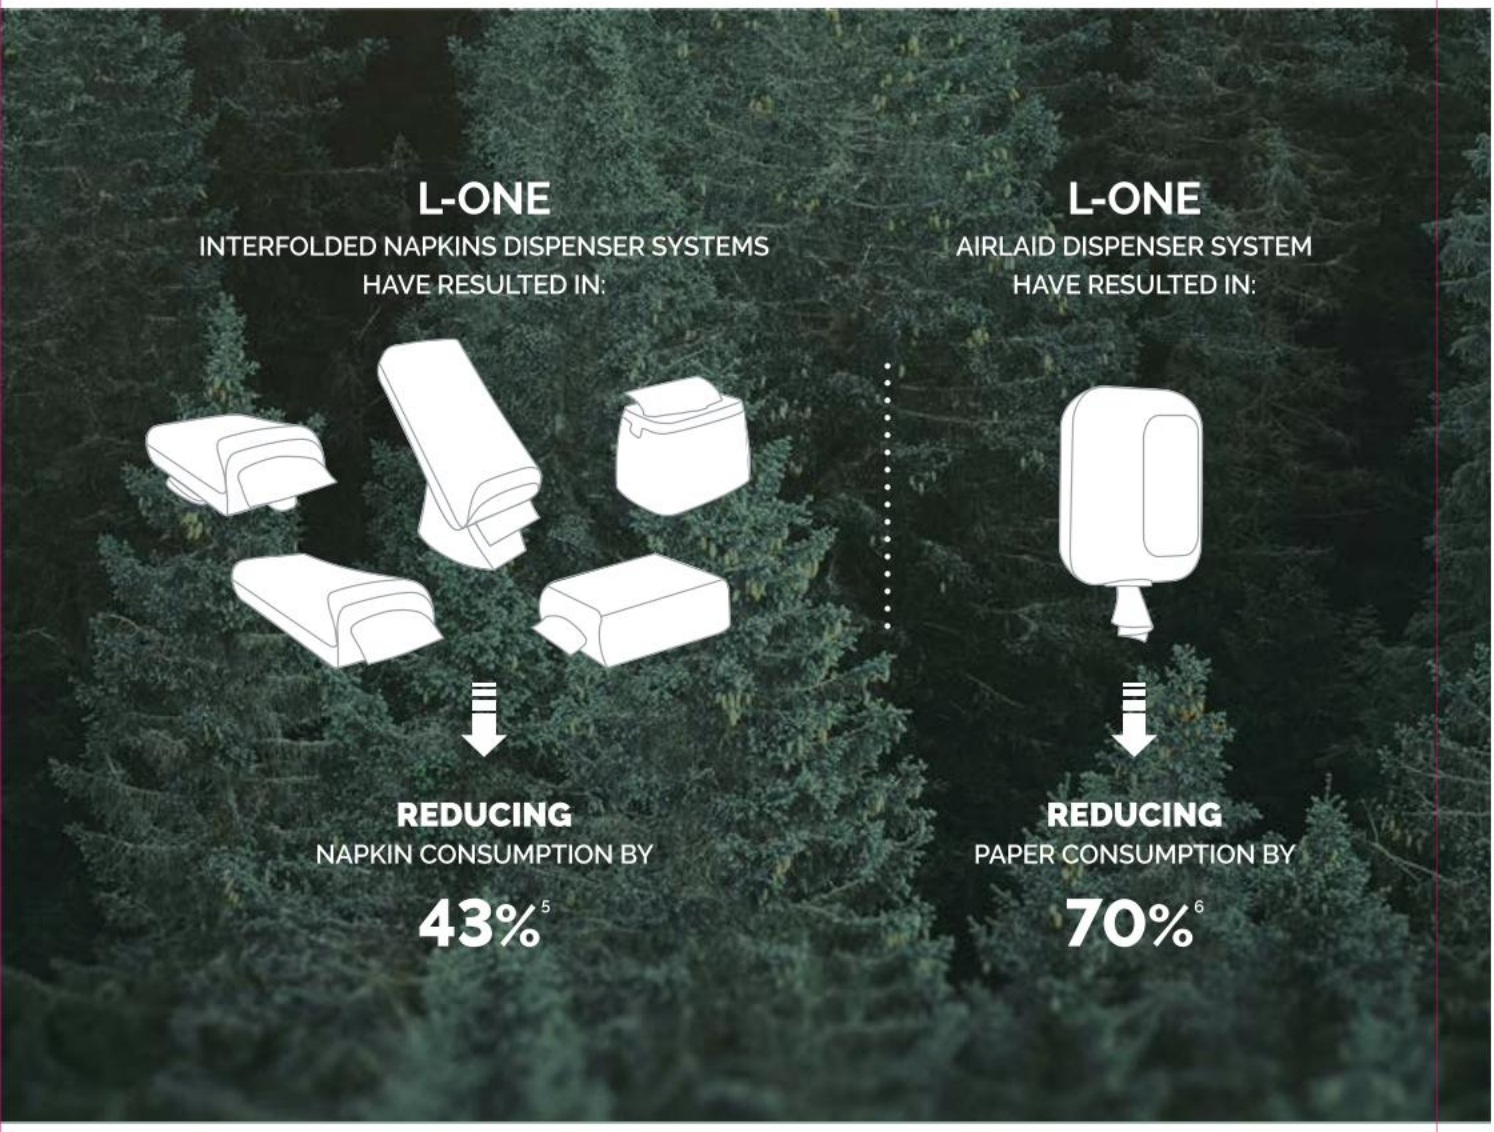

SOURCES: [1] European Union Life Cycle Database (ELCD). [2] United Nations Environment Programme, Report 2011: Towards a Green Economy.
[3] Considering 1L beverage cartons.

Reduce consumption, limit waste.

By sensibly reducing paper consumption, the **Identity** and **L-One paper+dispenser systems** also provide a tangible **contribution to social, environmental** and **economic sustainability**.

SOURCES: [4] Results from market research conducted by Research Factory on a representative sample, compared with a traditional Jumbo Lucart Professional dispenser and a traditional Lucart Professional folded handtowel dispenser. The research was conducted according to ASSIRM regulations in compliance with the ISO 20252 standard. Milan 2015. [5] Results from research conducted by Demoskopea on a sample of users of canteens/self-service outlets, in relation to a traditional napkin dispensing system. The research was conducted according to ASSIRM regulations in compliance with industry standard ISO 20252 and the ISO 9001 standard. Milan 2017. [6] Research results based on comparison with a traditional airlaid roll dispensing system, conducted by Demoskopea. The research was carried out in accordance with ASSIRM norms and conforms to ISO 20252 sector and ISO 9001 standards. Milan 2019.

ENVIRONMENTAL PRODUCT DECLARATION

REDUCE. REDUCE. REDUCE.

PRODUCTION ENVIRONMENTAL IMPACT RESULTS*
TISSUE PAPER FROM RECYCLED WASTE PAPER VS. TISSUE PAPER FROM VIRGIN CELLULOSE

-58%

CONSUMPTION OF NON-RENEWABLE RESOURCES

-23%

CONSUMPTION OF WATER RESOURCES

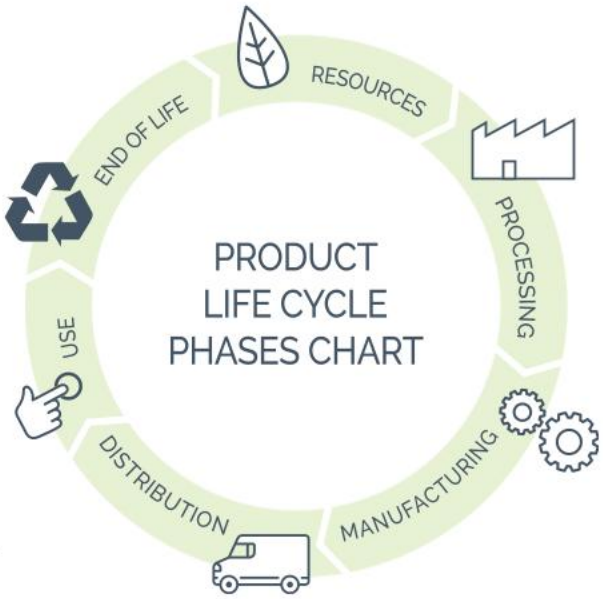

-16%

CO_2e EMISSIONS

The Environmental Product Declaration (EPD) describes the environmental impact related to the life cycle of a product.

EPD®

The **Life Cycle Assessment** on which the **EPD** study is based enabled Lucart to not only calculate but also compare the **environmental performance** of two different types of product: tissue paper from virgin cellulose and tissue paper from recycled waste paper, highlighting the substantial environmental benefits of the latter.

UNIQUE ENVIRONMENTAL IMPACT INDICATOR

Moreover, the results of the assessment on the environmental footprint of Lucart Professional's recycled paper product and the same product made with pure cellulose have been condensed in a single indicator** calculated from the impact values on the categories of global warming, acidification, photochemical oxidation and eutrophication, which resulted as the impact categories with the highest contribution to the environmental footprint. Once again, the result is significant: **environmental impact is down by -44%.**

* Analysis conducted on 10-roll Strong Lucart toilet paper and 10-roll Eco Lucart toilet paper products, through an environmental footprint study by the Institute of Management of the Scuola Superiore Sant'Anna in Pisa, April 2020.
**Characterisation, normalisation and weighing factors from the ILCD 2011 Midpoint+ v.1.10 method.

NEW PAPER PACKAGING

FREE FROM PLASTIC.

EcoNatural products, entirely plastic-free,
meet the demands of the market and the environment.

ZERO PLASTIC

TOTALLY NATURAL

> Lucart promotes constant improvement for its products by supporting and adopting the most innovative technologies to improve the sustainability of the primary and secondary packaging of its products.

Massimo Pasquini
CEO Lucart

The goal set by Lucart, i.e. achieving a **circular economy,** is drawing ever closer.

Indeed, also the packaging of some products in the new **EcoNatural** line – green par excellence, as it is made with Fiberpack® - is now entirely **plastic-free**. This means that the result is **twice as eco-friendly**, because the tissue paper is made from used beverage cartons, while the **outer pack is in recycled and recyclable paper**.

The project embodies a new facet of **sustainability** that further strengthens the positioning of the brand while tackling growing market challenges.

THE MMC® MODEL
(MUNICIPAL MATERIAL CYCLE)

CIRCULAR ECONOMY IN ACTION.

The MMC®, Municipal Material Cycle project,
the new virtuous recycling education model
with the direct involvement of the local community.

Involving the citizens and institutions of towns to create a culture of sustainability:
this is the goal of the new MMC® project, tested for the first time in Novo Mesto, Slovenia.

THE PROJECT INVOLVES THE DEVELOPMENT OF A CIRCULAR FLOW:

Used beverage cartons are collected by students' families.

By involving the local waste disposal company, Lucart receives the used beverage cartons and turns them into new products of the Lucart Professional EcoNatural line.

The products are sold, together with the related dispensers, to a local distribution partner that will distribute them in the bathrooms of offices, schools, public companies and sports centres in the area where the cartons have been collected.

The results from just two Slovenian participating municipalities in 2019 are 182 tons of used beverage cartons collected and transformed to tissue paper products.
That volume of recycled beverage cartons, covers the needs of 53% of Novo Mesto's and 41% of Ljubljana's municipal public facilities for paper towels and toilet paper.
Used beverage cartons left these municipalities as a waste and returned back transformed to a useful high quality tissue paper products.
The aim is to replicate it soon on a large scale across Europe, in a gradual process of internationalization.

THE E-SPACE PROJECT
(ECO-SCHOOLS PROJECT ADVANCING
THE CIRCULAR ECONOMY)

THE CIRCULAR ECONOMY PUTS ON THE TEACHING CAP.

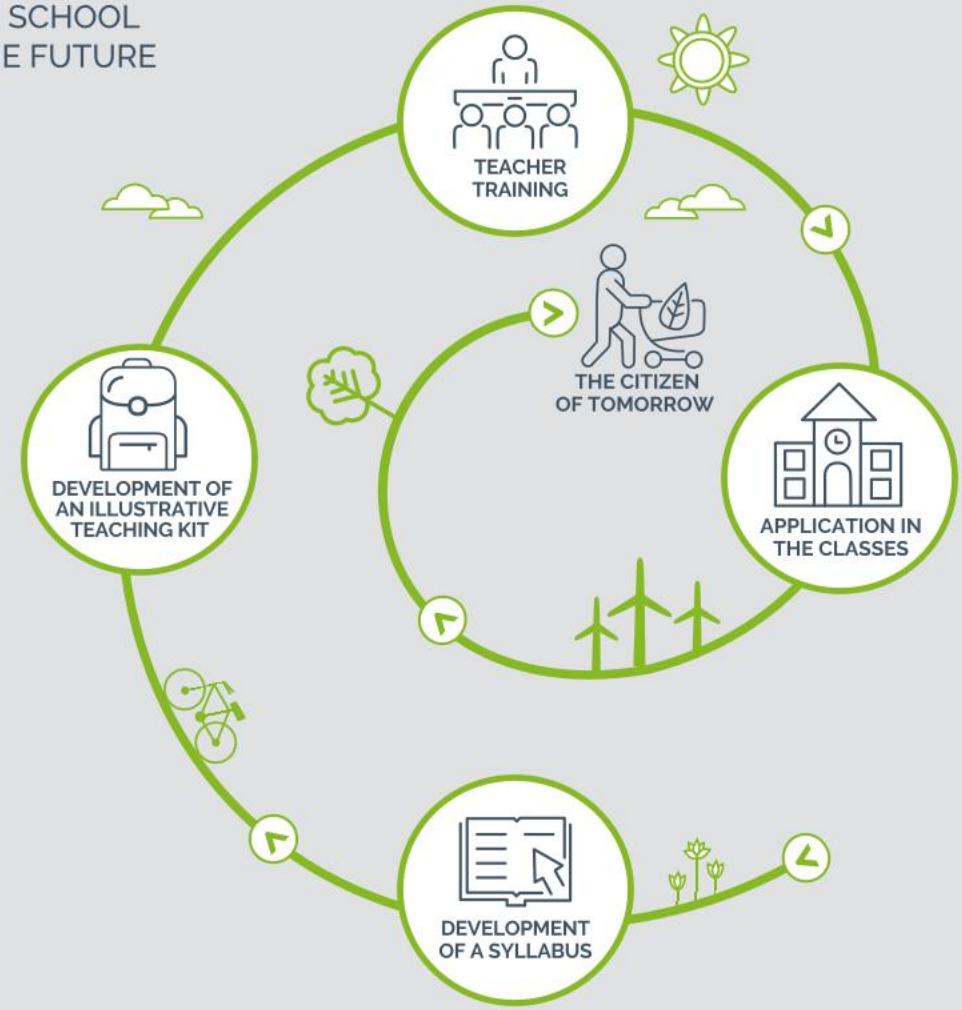

The E-Space project promotes the principles of circular economy in schools to educate young generations to the values of sustainability.

The E-Space project, in partnership with the **Foundation for Environmental Education (FEE),** was set up to promote in schools a **new awareness** of **circular economy** principles, where nothing goes to waste and everything turns into a **resource**.

The two-year pilot project will run till the end of March 2021 in Latvia and Slovenia, after which there are plans to extend E-Space to the entire Eco-Schools network of **over 52,000 schools in 68 countries**.

E-SPACE PROJECT FROM SCHOOL TO THE FUTURE

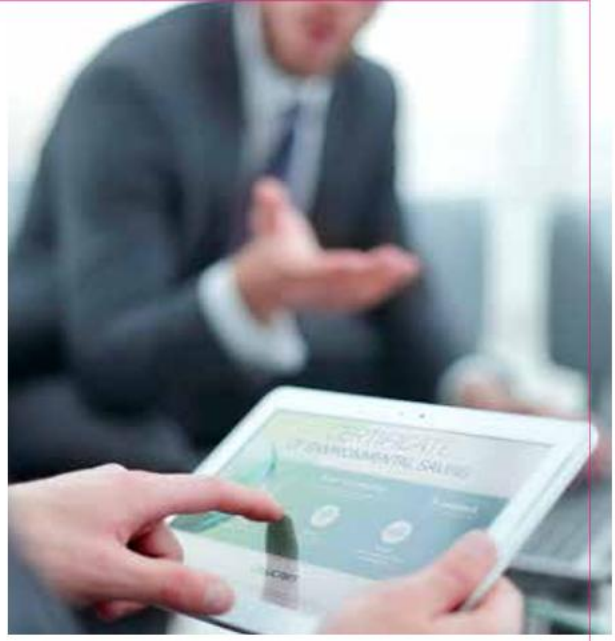

THE TOOLBOX
FOR THE SALES CHAIN

ENHANCE, SIMPLIFY.

The tools provided by Lucart Professional along the whole sales chain so that you can assess the extent of your ecological commitment or to help you and your customers conduct business.

1.

ENVIRONMENTAL SAVING CALCULATOR

This is an online application that enables you to palpably appreciate the environmental contribution deriving from the choice to purchase Fiberpack® products, with the related certificate that highlights the number of beverage containers recycled, the tonnes of CO_2e avoided and the number of trees saved.

2.

LUCART CONSUMPTION SIMULATOR

This is a web app used to estimate the consumption generated with Lucart dispensers to perfect the sales proposal prepared by a distributor.

3.

L-ONE WEB CONFIGURATOR

The L-One Food Service dispensers have spaces dedicated to communication, which the end customer can customize, through an online configurator, to present menus, evenings or events, starting from scratch or from pre-set templates.

4.

LUCART PROFESSIONAL DESIGN STUDIO

An innovative online tool to enable customers to create their advertising message on leaflets or catalogues in line with Lucart Professional's communication format.

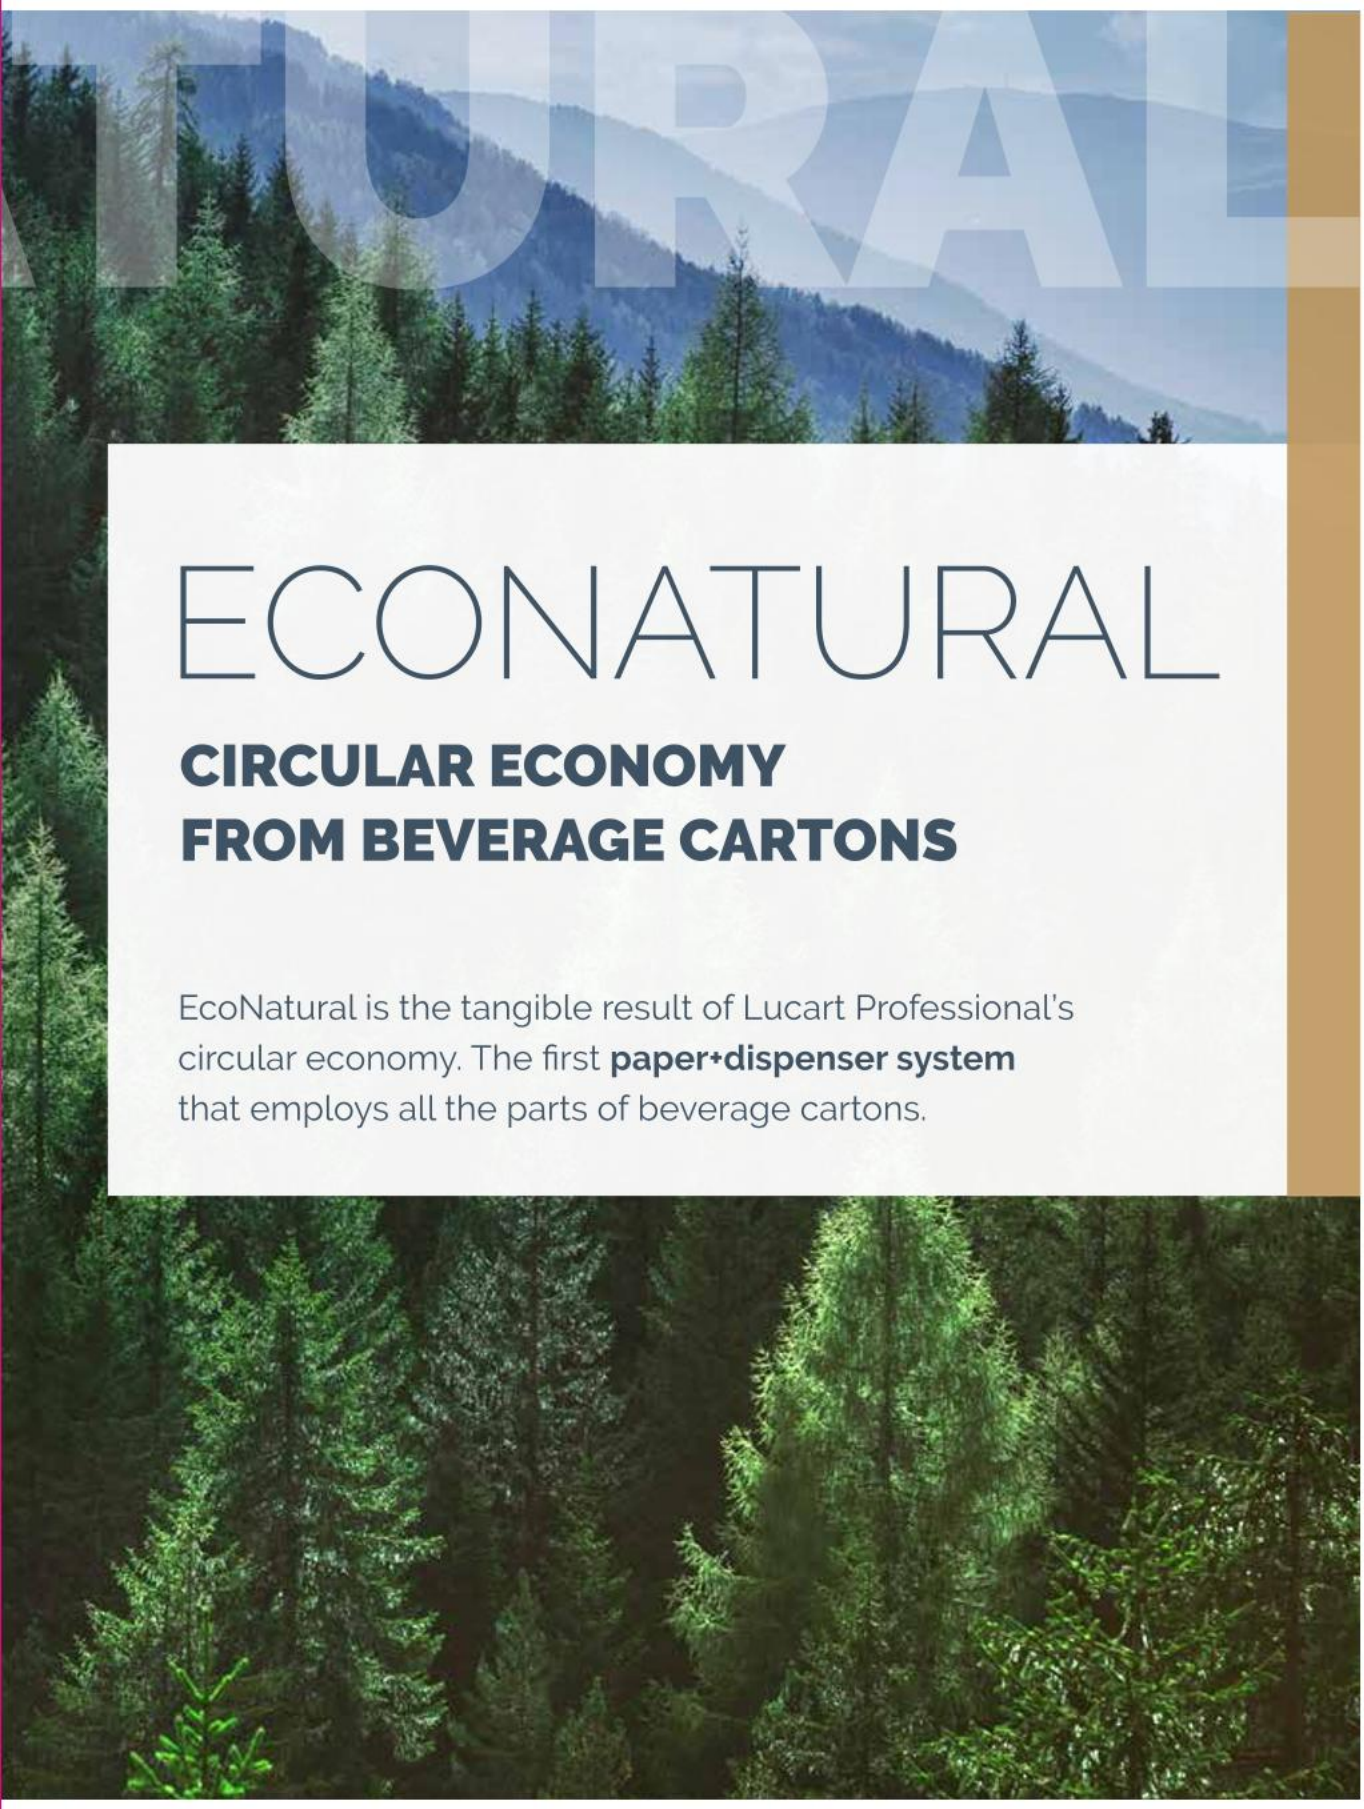

INNOVATION BECOMES THE SOLUTION.

The Away From Home sector is always after concrete
and innovative solutions.
Constant **Research and Development** enables Lucart Professional
to effectively meet these specific needs with a **wide range**
of paper products and dispenser systems that combine
performance, hygiene and sustainability.

ECONA

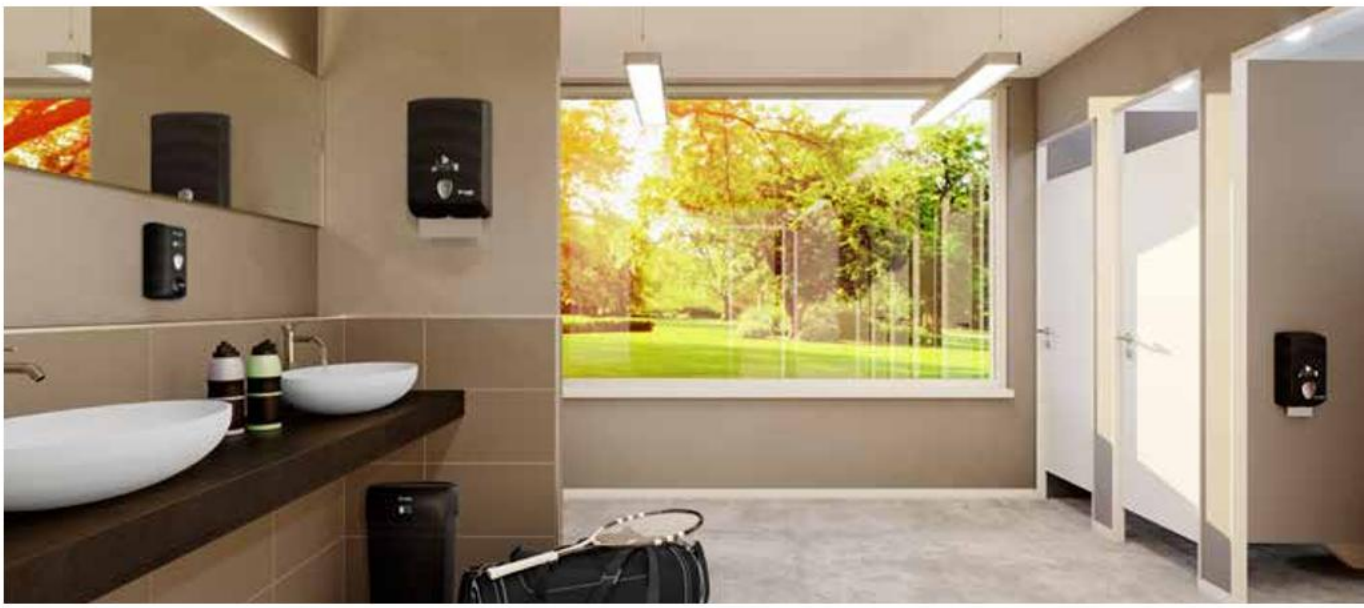

ECONATURAL

CIRCULAR ECONOMY FROM BEVERAGE CARTONS

EcoNatural is the tangible result of Lucart Professional's circular economy. The first **paper+dispenser system** that employs all the parts of beverage cartons.

ECONATURAL

THE SYSTEM THAT TURNS CIRCULAR ECONOMY INTO SOMETHING TANGIBLE

Thanks to its innovative technology, Lucart separates the individual components of beverage cartons.

From cellulose fibres, Lucart develops **Fiberpack®**, used to make EcoNatural, the paper that provides all the strength, absorbency and softness of a premium product with the guarantee of a safe and certified range.

With aluminium and polyethylene, Lucart makes **Al.Pe.®**, the new raw material used to produce the dispensers for every **washroom** and **healthcare** area.

CIRCULAR ECONOMY

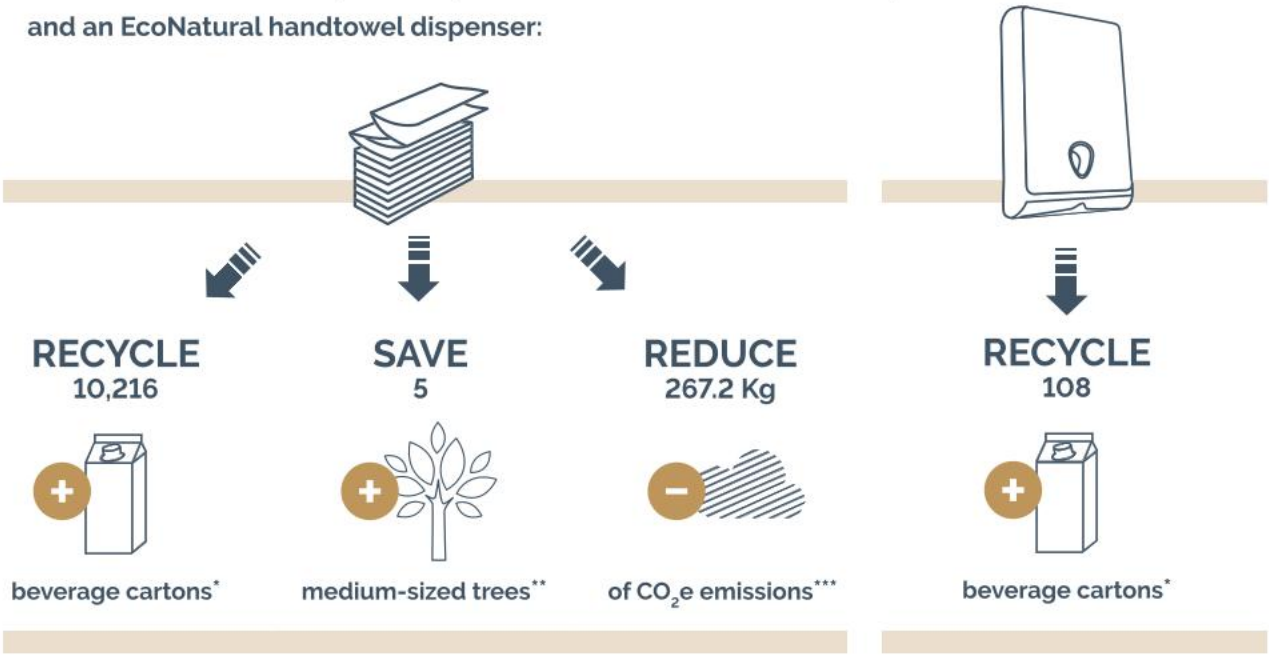

With its EcoNatural system, Lucart Professional introduces a **circular economy** model that adds value to used beverage cartons by turning them into two new raw materials.

RESPECT FOR THE PLANET

All EcoNatural products contribute to achieving real results for **environmental sustainability**.

Here is a simulation of a possible purchase of a Z-folded handtowel pallet and an EcoNatural handtowel dispenser:

RESULTS FOR YOUR BUSINESS

EcoNatural demonstrates the commitment to sustainability. **Lucart Professional certifies and promotes that choice:**

> with the **certificate of environmental saving,** stating the beverage cartons recycled, trees saved and CO_2e emissions reduced,

> with the **silk-screen printed dispenser,** to tell end users about the commitment to the environment.

AQUAS

AQUASTREAM

THE NO CLOG PAPER THAT TAKES JUST SECONDS TO DISSOLVE

AquaStream is the innovative product range that effectively prevents clogged toilets. It's ideal for all bathrooms with piping that is thin, winding or lacking gradient.

AQUASTREAM

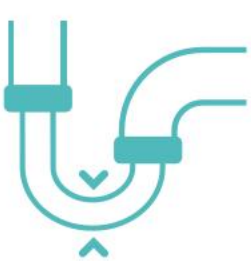

THE SOLUTION THAT PREVENTS THE RISK OF CLOGGING

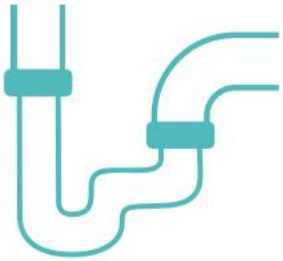

HANDTOWELS

A bathroom with narrow, winding or with a low gradient pipes can become easily clogged with traditional toilet paper. Likewise, a toilet with standard piping can be damaged if a paper handtowel is accidentally thrown in it. These are clogging issues that cause inconveniences, such as bathrooms out of order, repair costs, dissatisfied customers.

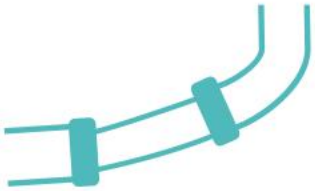

The range of AquaStream toilet paper and handtowels is the solution to this.

THIN PIPING

WINDING PIPING

LACKING GRADIENT PIPING

TOILET PAPER

AQUASTREAM TOILET PAPER

QUALITY PAPER THAT DISSOLVES IN 7sec*

> Soft and thick

> Ideal for all bathrooms with piping that is thin, winding or lacking gradient

> Ideal for aircraft, trains, ships, camp sites and bathing establishments

* Average value of measurements performed on samples of the AquaStream range of toilet papers, in compliance with standard AFNOR NF Q34-020. Test carried out at the Lucart laboratories using a roll of toilet paper with sheet size of 11x9.5 cm.

AQUASTREAM HANDTOWELS

STRONG AND ABSORBENT, THEY DISSOLVE IF THROWN IN THE TOILET

> High quality handtowels

> Ideal for bathrooms where the toilet is near the sink

> Prevent the risk of clogging

LABORATORY TESTS: COMPARISON BETWEEN DISPERSION TIMES**

A FEW MINUTES LATER, THE STANDARD HANDTOWEL **STILL HASN'T DISSOLVED**

WORKPLACE AREA

The L-One dispensers contain centre pull wipers dispensed one sheet at a time. Compact and versatile, they are ideal for professional kitchens, mechanical workshops and any other industrial setting.

L-ONE FOR AIRLAID

PAPER SAVINGS GUARANTEED*

Single-sheet dispensing delivers a reduction in consumption of 70%*, meaning:

- **LESS WASTE**: fewer sheets used and less time spent refilling.
- **LOWER COSTS**: reduced maintenance, fewer refills and less transport.
- **REDUCED STORAGE**: less stockroom space required.

PRACTICAL ONE-HAND ACTION

You can extract a single sheet using just one hand in a fast, simple action to ensure optimal efficiency and productivity.

HYGIENIC AND SAFE

The dispenser protects the roll from dust and dirt, and the single-sheet extraction system means each sheet is handled only by the person using it, eliminating possible cross-contamination in accordance with HACCP requirements.

*Research results based on comparison with a traditional airlaid roll dispensing system, conducted by Demoskopea. The research was carried out in accordance with ASSIRM norms and conforms to ISO 20252 sector and ISO 9001 standards. Milan 2019.

AIRTECH

THE AIRLAID WHICH ENHANCES THE PERFORMANCE

Wiper rolls, multi-purpose cloths and handtowels have the same versatility and hygiene of paper, the consistency and strength of a cloth, and the absorbency of a sponge, even wet.

AIRTECH

USE IT, RINSE IT AND USE IT AGAIN

The **exclusive Airlaid technology**, using air instead of water in the production process of pure cellulose fibres, together with the special three-dimensional weave, provide the **AirTech** products with an **extraordinary absorbency capacity and strength**, even when wet.

AirTech products can be reused up to 9 times and can absorb up to 7 times their weight, which makes them the ideal product in settings requiring **high performances**.

WASHROOM
WORKPLACE
HEALTHCARE

3 PERFORMANCES

VERSATILE AS PAPER

Dermatologically tested and suitable for contact with food, they are ideal in different settings of use:

> Industry

> Food preparation

> Washroom

> Beauty / Hairdresser

> Office / Cleaning

> Hospital / Retirement home

USE >>

RINSE >>

RE-USE...UP TO 9 TIMES!

WITH 1 PRODUCT

RESISTANT AS A CLOTH

The AirTech products have the same consistency and strength of a cloth.
They can be reused up to 9 times.

ABSORBENT AS A SPONGE

Thanks to the production process and to the specific texture,
airlaid paper can absorb up to 7 times their weight.

Lucart Professional has developed the new **Peel&Pull** system for the packaging of some AirTech products: a soft, self-dispensing pack that allows you to pull out one cloth at a time. This means: more convenience, less waste and the guarantee of tidiness and hygiene for cloths that have not yet been used.

EASY PEEL

EASY PULL

AIRTECH MULTI-PURPOSE CLOTHS

Highly versatile products particularly suitable for use in the medical, health and beauty sectors.

AIRTECH PERFORMANCE RANKING

HYGIENE

HYGIENE & SAFETY

A selection of specific products to guarantee professional hands cleaning in environments with people aggregation at risk of contamination.

HYDROALCOHOLIC GEL CLEANSER

Hand cleansing gel with **antimicrobial active principles**.
Ideal for any situation involving large groups or frequent footfall, such as medical centres, hospitality venues, retail outlets and trade fairs.

75% ALCOHOL

Formulated to dissolve even the most stubborn organic components for **superior hygiene**.

INSTANT ACTION

Easy to use and **fast drying** due to the alcohol's rapid evaporation properties. **No greasy** residue, no rinsing required.

GENTLE ON THE SKIN

Dermatologically tested and approved.

IDENTITY NOWATER CLEANER

Hand cleaning liquid dispenser with **antimicrobial active** ingredients.
Ideal for environments at risk of contamination.

MAXIMUM HYGIENE
Reduced risk of transmission of infectious diseases.
Prevents bacterial cross-contamination.

GENTLE ON THE SKIN
Contains glycerine. Dermatologically tested and approved.

NEUTRAL FRAGRANCE
Ideal for any environment.

NOWATER CLEANER TOWEL

Airlaid cleaning wipes containing NoWater Cleaner liquid with **antimicrobial substances**. Ideal for use away from home on those occasions when soap and water may not be available or for more thorough cleaning.

MAXIMUM HYGIENE
Ensures hands are thoroughly cleaned when rubbed into the skin.

GENTLE ON THE SKIN
Contains glycerine. Dermatologically tested and approved.

VERSATILE
Ideal not only for cleaning hands but also for small surfaces.

PAPER HANDTOWEL VS AIR OR JET DRYERS: A GUARANTEE OF GREATER HYGIENE.

In case of traditional washing with soap and water, the **hygiene and safety of paper drying systems such as those of Lucart Professional** are proven by authoritative international studies.

THE PRODUCTS FOR YOUR BUSINESS.

Lucart Professional provides a wide range of products and systems. Various solutions to meet all the needs of the professionals with a single goal: guaranteed reliability, performance and sustainability.

ECONATURAL

EcoNatural is the new PAPER+DISPENSER line based on a **circular economy** model through the transformation of used beverage cartons into two new raw materials: **Fiberpack®** and **Al.Pe.®**.
Fiberpack® products in the EcoNatural line have the EU Ecolabel and FSC® Recycled certifications.

ECO

Eco is a line entirely made with recycled and regenerated fibres. A wide product range that combines quality and care for the environment to meet any kind of need. All the products of the Eco line are EU Ecolabel-certified.

STRONG

Strong is the comprehensive line of products entirely made with virgin cellulose fibres, in accordance with the environmental sustainability criteria set by the PEFC™ forestry certification. The solution that provides high performance results and excellent quality.

AQUASTREAM

AquaStream is the range of toilet paper and handtowel that dissolve in a matter of seconds. Made with PEFC™-certified virgin cellulose, AquaStream products are also EU Ecolabel certified and represent the perfect solution to prevent clogging.

AIRTECH

AirTech is the dry paper line made with the exclusive airlaid technology that employs air in the processing of pure cellulose fibres. The products thereby acquire extraordinary absorbency and resistance, providing unparalleled performance levels.

SKYTECH

SkyTech is the recycled line characterised by the distinctive blue colour.

EASY

Easy is a basic line entirely made with recycled paper, the comprehensive solution striking the ideal balance of quality and an excellent price/quality ratio.

FATO

YOUR PERSONAL TABLE STYLIST

Transforming fantasy into glorious colours and exquisite patterns. Creating enchanting original combinations of shapes and materials. Exploring new trends and reinterpreting much-loved favourites from times gone by.

Adding that finishing touch to your bar, hotel, café or restaurant décor has never been so easy. The Fato range of table accessories has everything you need to create the atmosphere you want, bringing all the elements of your design theme together to produce the wow effect for your customers.

Fato draws on Made in Italy design excellence and quality to place a riot of colour, designs, textures, themes and materials at your fingertips. We may be part of a large, international group but we never forget that it's the fine details which make the difference, especially when it comes to creating a unique experience for your clientele.

Fato. Your Personal Table Stylist.

To discover the complete range of Fato products
go to www.fato.com or ask for a catalogue.

TABLEWEAR

A refined range of superior airlaid items for a perfectly coordinated table décor.
With a texture which recalls the caressing softness of woven fabrics, our Tablewear products create an effortlessly elegant, exclusive atmosphere, no matter the size or location of your venue.

FATO NATURAL

The use of unbleached cellulose fibres found in Tetra Pak® beverage cartons give these napkins their muted, light brown colour, reminiscent of natural wood. Discreet and plain, these versatile napkins combine seamlessly with any décor.
Fato Natural is the eco-trendy solution for venues which are proud to display their respect for the environment without sacrificing aesthetic appeal.

STAR

Original, on-trend designs combine with exquisite softness to create the Star collection.
Interpreting the latest styles in a choice of monochromatic and patterned napkins,
they add a contemporary flourish to tables in any environment.
