Members' report for the financial year ended 30 June 2020

The members present their report and the audited consolidated financial statements of PricewaterhouseCoopers LLP ('the LLP') and its subsidiary undertakings (together 'the Group') for the financial year ended 30 June 2020.

Principal activities

The principal activity of the LLP and the Group is the provision of professional services.

Governance

The governance structure of the LLP primarily comprises the following:

- A Management Board, consisting of members of the Executive Board and Clients and Markets Executive, responsible for the policies, strategy, direction and management of the LLP. The Management Board is assisted by:
 - The Executive Board, responsible for the execution of the policies, strategy and management of the LLP.
 - The Clients and Markets Executive, responsible for overseeing the LLP's client-facing and market activities.
 - An International Committee, responsible for decision making in relation to and oversight of the LLP's strategic alliances, matters relating to regionalisation and approval of any matters relating to the PwC global network.
 - An Investment Committee, which supports growth of the LLP by providing governance for investments, including acquisitions, joint ventures and disposals.
 - A Partner Matters Committee, responsible for certain human resource matters relating to members.
 - A Client Committee, a committee of the Clients and Markets Executive, which considers engagement and client acceptance decisions.
 - An Executive Risk Committee, responsible for maintaining an effective risk framework and overseeing and challenging the management of risk across the LLP.
- A Supervisory Board, which considers, reviews and gives guidance to the Management Board on matters which the Supervisory Board considers to be of concern to the members, having regard to the interests and wellbeing of the LLP as a whole. The Audit Committee, a committee of the Supervisory Board, monitors and reviews the integrity of the Group's financial statements.
- A Public Interest Body, constituted to discharge duties under the Audit Firm Governance Code and responsible for considering the public interest aspects of the LLP.

Designated members

The designated members (as defined in the Limited Liability Partnerships Act 2000) of the LLP during the whole of the financial year ended 30 June 2020 were Kevin Ellis, Warwick Hunt and Kevin Burrowes. On 1 July 2020, Kevin Burrowes stepped down as a designated member.

Members' capital

The Group is financed through a combination of members' capital, undistributed profits and borrowing facilities. Members' capital contributions totalling £277m (2019: £263m) are determined by the Executive Board with the approval of the Supervisory Board, having regard to the working capital needs of the business. They are set by reference to an individual member's equity unit profit share and are repayable following the member's retirement.

Members' profit shares and drawings

Members receive a distribution out of the profits of the LLP after adjusting for their obligations to make annuity payments to certain former partners and other equity adjustments. The final allocation and distribution of profit to individual members is made by the Executive Board once their individual performance has been assessed and the annual financial statements have been approved. The Supervisory Board approves the process and oversees its application.

Each member's profit share comprises three interrelated components dependent upon the overall profitability of the LLP:

- Responsibility income – reflecting the member's sustained contribution and responsibilities.
- Performance income – reflecting how a member and their team(s) have performed.
- Equity unit income – reflecting the member's capital contribution.

Each member's performance income is determined by assessing achievements against an individually tailored balanced scorecard of objectives, based on the member's role. These objectives include ensuring the delivery of quality services, managing risk effectively and maintaining independence and integrity. There is transparency among the members over the total income allocated to each individual.

The overall policy for members' monthly drawings is to allocate a proportion of the profit during the financial year, taking into account the need to maintain sufficient funds to settle members' income tax liabilities and to finance the working capital and other needs of the business. The Executive Board, with the approval of the Supervisory Board, sets the level of members' monthly drawings, based on a percentage of their individual responsibility income.

Members' report continued

Going concern

In its assessment of going concern, the Executive Board has considered the current and developing impact of the COVID-19 pandemic on the Group. The Group has continued to operate effectively, providing ongoing services to clients and with the Group's working capital position remaining adequate.

However, the Group has seen a reduction in revenues over the recent period and as part of its going concern assessment the Executive Board has evaluated the potential ongoing impact of COVID-19, including planning appropriate responses for a range of potential outcomes.

Additional measures have been implemented, including a tight focus on ensuring the continued ability to deliver ongoing work and win new assignments, the associated billing, cash collection and management of the Group's working capital position, strict control of discretionary expenditure, deferral of certain investments and other outflows, including staff bonuses and member distributions, and increasing the Group's borrowing facilities as a precautionary measure.

Should the pandemic and its economic impacts significantly worsen, there are a number of further measures available to lessen the impact on the Group, including further postponement or curtailment of spend, additional capital contributions from members and the further deferral of member distributions.

It is difficult to predict the overall outcome and impact of COVID-19, however the Executive Board's central assumption is that trading activity will remain relatively subdued in the early part of the financial year to 30 June 2021 and gradually improve as the year progresses. In the plausible downside scenarios considered by the Executive Board, the duration of the pandemic and its economic effects are assumed to be progressively more prolonged, resulting in more severe adverse impacts to trading activity and revenue, which would lead to an overall reduction in profitability but which would still remain manageable within the Group's overall working capital financing facilities. No immediate restructuring of the Group's cost base has been assumed as the Executive Board seeks to retain the Group's productive capacity in anticipation of the resumption of growth, although this will continue to be kept under review.

Having regard to all of the above, the Executive Board has, at the time of approving the financial statements, a reasonable expectation that the Group will be able to continue in operational existence for the foreseeable future. Thus, the going concern basis has been adopted in preparing the consolidated financial statements.

Statement of members' responsibilities in respect of the financial statements

The Companies Act 2006, as applied to limited liability partnerships, requires members to prepare financial statements for each financial year, which give a true and fair view of the state of affairs of both the LLP and the Group, and of the profit or loss of the Group for that financial year. In preparing those financial statements, the members are required to:

- select suitable accounting policies and then apply them consistently, subject to any changes disclosed and explained in the financial statements;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- make judgements and estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis, unless it is inappropriate to assume that the LLP or the Group will continue in business.

The members are responsible for safeguarding the assets of the LLP and the Group, and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The members are responsible for keeping adequate accounting records that disclose with reasonable accuracy at any time the financial position of the LLP and the Group, and enable them to ensure that the financial statements comply with the Companies Act 2006, as applied to limited liability partnerships.

The members are also responsible for the maintenance and integrity of the LLP's website on which the financial statements are available. Legislation governing the preparation and dissemination of financial statements may differ in other jurisdictions from that in the United Kingdom.

These responsibilities are fulfilled by the Executive Board on behalf of the members.

The Executive Board confirms that it has complied with the above requirements in preparing the financial statements.

Signed on 12 August 2020 on behalf of the Executive Board by:

Kevin Ellis
Chairman and Senior Partner

Warwick Hunt
Managing Partner and Chief Operating Officer

Independent auditor's report to the members of PricewaterhouseCoopers LLP

Report on the audit of the financial statements

Opinion

We have audited the financial statements of PricewaterhouseCoopers LLP ('the LLP') and its subsidiaries (together 'the Group') for the financial year ended 30 June 2020, which comprise:

- the consolidated income statement and consolidated statement of comprehensive income of the Group for the financial year ended 30 June 2020;
- the statements of financial position of the Group and the LLP at 30 June 2020;
- the statements of cash flows and statements of changes in equity of the Group and the LLP for the financial year ended 30 June 2020; and
- the notes to the financial statements, which include a summary of significant accounting policies and other explanatory information.

The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards ('IFRS') as adopted by the European Union and, as regards to the LLP's financial statements, as applied in accordance with the provisions of the Companies Act 2006, as applied to limited liability partnerships.

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the LLP's affairs at 30 June 2020 and of the Group's profit and of the Group's and the LLP's cash flows for the financial year then ended;
- the Group's financial statements have been properly prepared in accordance with IFRS as adopted by the European Union;
- the LLP's financial statements have been properly prepared in accordance with IFRS as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2006, as applied to limited liability partnerships; and
- the Group's and the LLP's financial statements have been prepared in accordance with the requirements of the Companies Act 2006, as applied to limited liability partnerships.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ('ISAs (UK)') and applicable law. Our responsibilities under those standards are further described below in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the financial statements, including the Financial Reporting Council's Ethical Standard and we have fulfilled our other ethical responsibilities in accordance with these requirements. We consider that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (UK) require us to report to you when:

- the members' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the members have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Group's and the LLP's ability to continue to adopt the going concern basis of accounting for a period of at least 12 months from the date when the financial statements are authorised for issue.

Overview of our audit approach

Materiality

In planning and performing our audit we applied the concept of materiality. An item is considered material if it could reasonably be expected to change the economic decisions of a user of the financial statements. We used the concept of materiality to both focus our testing and evaluate the impact of misstatements identified.

Based on our professional judgement, we determined overall materiality for the Group's and LLP's financial statements as a whole to be £33m (2019: £35m) and £30m (2019: £32.5m) respectively. In determining this, we have given specific focus and weighting to the benchmarks in respect of revenue (0.75% of Group and LLP revenue) and profit for the financial year (5% of Group and LLP profit for the financial year). We considered these benchmarks given the focus on the Group's revenue in external league tables and the importance of the profit measure.

We use a different level of materiality ('performance materiality') to determine the extent of our testing for the audit of the financial statements. Performance materiality is set based on the audit materiality as adjusted for the judgements made as to the entity risk and our evaluation of the specific risk of each audit area having regard to the internal control environment.

Where considered appropriate, performance materiality may be reduced to a lower level, such as for related party transactions.

We agreed with the Audit Committee to report to it all identified errors in excess of £0.5m (2019: £0.5m). Errors and misstatements below that threshold would also be reported if, in our opinion as auditor, disclosure was required on qualitative grounds.

Independent auditor's report to the members of PricewaterhouseCoopers LLP continued

Overview of our audit approach continued

Overview of the scope of our audit

The financial reporting function for the Group and its material subsidiaries is centralised in one operating location in the UK, with the exception of the Middle East group of subsidiaries. This year, due to the COVID-19 pandemic, our audit was conducted remotely rather than from the main operating location and all material subsidiaries, including the Middle East group of subsidiaries, were within the scope of our audit testing.

For the Middle East group of subsidiaries, in order to obtain sufficient audit evidence for the purposes of our audit opinion, a member firm of the Crowe Global network undertook specified audit procedures in the Middle East under our direction and supervision. We planned the work following a series of planning meetings with local management and the component auditor. We have reviewed the work of the component auditor and discussed matters with local management and the component auditor.

Key audit matters

In preparing the financial statements, the Executive Board, on behalf of the members, made a number of subjective judgements, for example in respect of critical accounting estimates that involved making assumptions and considering future events that are inherently uncertain. We focused our work primarily on these areas by assessing the Executive Board's judgements against available evidence, forming our own judgements and evaluating the disclosures in the financial statements. We also addressed the risk of management override of controls, including evaluating whether there was evidence of bias by the Executive Board,

which may represent a risk of material misstatement, especially in areas of critical accounting estimates and key judgements as outlined in note 1.

Key audit matters are those matters we identified that, in our professional judgement, were of most significance in our audit of the financial statements of the current financial year and included the most significant assessed risks of material misstatement, whether or not due to fraud. These matters are those that had the greatest effect on the overall audit strategy, the allocation of resources on the audit, and on directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In our audit, we tested and examined information, using sampling and other auditing techniques, to the extent we considered necessary to provide a reasonable basis for us to draw conclusions. We obtained audit evidence through testing the effectiveness of controls, substantive procedures or a combination of both.

In determining the key audit matters, we noted that there have been no changes in the Group's operations during the financial year that significantly impacted upon our audit. Our assessment of the most significant risks of material misstatement and resulting key audit matters are as detailed below.

These key audit matters relate to both the Group and LLP. This is not a complete list of all risks identified by our audit.

Key audit matter

How the scope of our audit addressed the key audit matter

Revenue recognition and the valuation of contract assets

The Group enters into a broad range of client contract types. The timing of revenue recognition on these contracts is dependent on the fulfilment of contractual terms that can be complex and involve subjective judgements on contract completeness and recoverability. Estimates are also required in assessing the value of contract assets.

Revenue recognition and the valuation of contract assets are included within note 1 as areas of critical accounting estimate and key judgement. The accounting policy for revenue is outlined in note 2. The disclosure of contract assets and contract liabilities is included within notes 13 and 15 respectively.

We selected a sample of client assignments focusing on material contracts and contracts that met certain identified risk criteria. Our testing focused on ensuring that revenue was recognised in accordance with the accounting policy and included obtaining details of the underlying contract, agreeing key engagement terms regarding enforceable rights to payment for work performed to date, obtaining evidence of fulfilment and the justification for the stage of completeness.

As part of our work we challenged a range of areas including whether identified performance obligations were distinct, performance obligations had been satisfied for revenue recognised, the right to payment for work performed to date was enforceable in certain situations, assessments of costs to complete were appropriate and consistent with other evidence and whether the Group was acting as principal or agent.

We found no material misstatements arising from our testing.

We consider the disclosure in note 2, 13 and 15 to the financial statements to be appropriate having given specific regard to this being an area of critical accounting estimate and key judgement.

Independent auditor's report to the members of PricewaterhouseCoopers LLP continued

Key audit matter

How the scope of our audit addressed the key audit matter

Provisions for claims and regulatory proceedings

Disputes arise in the normal course of business. We focused on this area because of the potential financial impact that a major claim or regulatory proceeding could have on the Group and because of the uncertainties involved, including the need to exercise judgement.

Provisions in respect of claims and regulatory proceedings are included within note 1 as an area of critical accounting estimate. The disclosure of provisions for claims and regulatory proceedings is included in note 18.

We met with the Group's General Counsel to discuss claims and actions by regulatory bodies. We examined these matters and considered the processes for ensuring the completeness of the reporting of claims and for assessing the risk of unrecorded claims. We examined the Group's insurance arrangements and considered the impact of those terms and the level of cover on the provisions made.

We consider the estimates made by management in determining the provisions for claims and regulatory proceedings to be reasonable in light of the evidence available to the date of this report.

We consider the disclosure in note 18 to the financial statements to be appropriate having given specific regard to this being an area of critical accounting estimate.

Going concern

The assessment of going concern requires management to make a range of estimates and judgements about the future performance of the business. The impact of COVID-19 has made this forecasting process more complex with a wider range of reasonably possible scenarios.

Enhanced disclosures relating to going concern have been included within the financial statements and the members' report.

We obtained management's assessment of going concern which covered the period to 30 June 2022. This assessment contained different scenarios to reflect a number of possible impacts from the pandemic.

We considered the appropriateness of the scenarios prepared and whether, in our opinion, they covered the range of reasonably possible outcomes. We considered the appropriateness of the assumptions made by management including considering the mitigating actions identified to help conserve or generate cash. As part of this assessment we considered compliance with facilities agreements.

Other information

The members are responsible for the other information. The other information comprises the members' report and the energy and carbon reporting, which is published with the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether it is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we are required to report by exception

We have no exceptions to report in respect of the following matters which the Companies Act 2006, as applied to limited liability partnerships, requires us to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns.

Responsibilities of the members for the financial statements

As explained more fully in the Statement of members' responsibilities in respect of the financial statements set out on page 3, the members are responsible for the preparation of the Group's and LLP's financial statements and for being satisfied that they give a true and fair view, and for such internal control as the members determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the members are responsible for assessing the Group's and LLP's ability to continue as a going concern and for using the going concern basis of accounting unless the members either intend to liquidate the Group or the LLP or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is set out on the Financial Reporting Council's website at: www.frc.org.uk/auditscopeukprivate. This description forms part of our auditor's report.

Use of our report

This report is made solely to the LLP's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006, as applied to limited liability partnerships. Our audit work has been undertaken so that we might state to the LLP's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the LLP and the LLP's members as a body for our audit work, for this report, or for the opinions we have formed.

Notes to the financial statements for the financial year ended 30 June 2020

1 Basis of preparation

These financial statements consolidate the results and financial position of PricewaterhouseCoopers LLP ('the LLP') and its subsidiary undertakings (together 'the Group').

The financial statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') and IFRS Interpretation Committee ('IFRIC') interpretations, as adopted by the European Union ('EU'), together with those parts of the Companies Act 2006 applicable to limited liability partnerships ('LLPs') reporting under IFRS.

Accounting policies that relate to the financial statements as a whole are set out below, while those that relate to specific areas of the financial statements are shown in the corresponding note. All accounting policies have been consistently applied to all the financial years presented, with the exception of the policies affected by the transition to IFRS 16 'Leases', as detailed below, and other new standards and interpretations adopted during the financial year, which have not had a material impact on the financial statements.

The financial statements have been prepared on a going concern basis under the historical cost convention, except as otherwise described in the accounting policies.

In its assessment of going concern, the Executive Board has considered the current and developing impact of the COVID-19 pandemic on the Group. The Group has continued to operate effectively, providing ongoing services to clients and with the Group's working capital position remaining adequate.

However, the Group has seen a reduction in revenues over the recent period and as part of its going concern assessment the Executive Board has evaluated the potential ongoing impact of COVID-19, including planning appropriate responses for a range of potential outcomes.

Additional measures have been implemented, including a tight focus on ensuring the continued ability to deliver ongoing work and win new assignments, the associated billing, cash collection and management of the Group's working capital position, strict control of discretionary expenditure, deferral of certain investments and other outflows, including staff bonuses and member distributions, and increasing the Group's borrowing facilities as a precautionary measure.

Should the pandemic and its economic impacts significantly worsen, there are a number of further measures available to lessen the impact on the Group, including further postponement or curtailment of spend, additional capital contributions from members and the further deferral of member distributions.

It is difficult to predict the overall outcome and impact of COVID-19, however the Executive Board's central assumption is that trading activity will remain relatively subdued in the early part of the financial year to 30 June 2021 and gradually improve as the year progresses. In the plausible downside scenarios considered by the Executive Board, the duration of the pandemic and its economic effects are assumed to be progressively more prolonged, resulting in more severe adverse impacts to trading activity and revenue, which would lead to an overall reduction in profitability but which would still remain manageable within the Group's overall working capital financing facilities. No immediate restructuring of the Group's cost base has been assumed as the Executive Board seeks to retain the Group's productive capacity in anticipation of the resumption of growth, although this will continue to be kept under review.

Having regard to all the above, the Executive Board has at the time of approving the financial statements a reasonable expectation that the Group will be able to continue in operational existence for the foreseeable future. Thus, the going concern basis has been adopted in preparing the consolidated financial statements.

Changes in accounting policy

During the financial year, the Group opted to reclassify Middle East end-of-service benefit obligations, previously recognised within trade and other payables as permitted by IAS 19 'Employee Benefits', separately on the statement of financial position. This has resulted in the reclassification at 30 June 2019 of £35m from accruals, within trade and other payables, to retirement benefit obligations. There has been no impact on the previously reported Group net assets, equity or members' interests at 30 June 2019. The reclassification has affected certain amounts presented in notes 3, 10, 15 and 22.

Refer to note 22 for further details on the end-of-service benefit schemes.

Notes to the financial statements continued

1 Basis of preparation continued

New standards and interpretations adopted in the financial year

IFRS 16 'Leases'

On 1 July 2019, the Group adopted IFRS 16 'Leases' which replaced IAS 17 'Leases'. The new standard addresses the definition, recognition and measurement of leases. The key change arising from IFRS 16 is that most operating leases are now accounted for as a right-of-use asset and a lease liability based on discounted future lease payments. The asset is depreciated over its useful economic life, while lease payments are apportioned between a repayment of the lease liability and a finance charge.

Under the modified retrospective transition approach, IFRS 16 permits a choice on initial adoption, on a lease-by-lease basis, to measure the right-of-use asset at either the carrying amount had IFRS 16 been adopted since the commencement of the lease or at an amount equal to the lease liability adjusted for accrued and prepaid amounts. The Group has elected the latter approach, with the reclassifications and adjustments arising from the new leasing rules recognised in the opening statement of financial position on transition on 1 July 2019. No adjustments were required to opening reserves on adoption of the standard on 1 July 2019. Refer to note 4 for the impact on the income statement of the adoption of IFRS 16 in the current financial year, compared to the prior financial year.

The Group has applied the following practical expedients set out in IFRS 16 in respect of the first-time adoption of the standard:

- The application of a single discount rate to a portfolio of leases with reasonably similar characteristics.
- Reliance on previous assessments as to whether leases are onerous as an alternative to performing an impairment review. The impact of onerous lease provisions on the recognition of the right-of-use asset at 1 July 2019 was £1m.
- Accounting for leases with a remaining lease term of less than 12 months at 1 July 2019 as short-term leases.
- Excluding initial direct costs from the measurement of the right-of-use asset at the date of initial application.
- The use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

For contracts entered into before 1 July 2019, the Group has relied on its assessment made in applying IAS 17 and Interpretation 4 'Determining whether an Arrangement contains a Lease', rather than assessing whether a contract is or contains a lease at the date of initial application.

The following table provides a reconciliation of the Group's commitments under non-cancellable operating leases to the opening lease liability recognised under IFRS 16.

	£m
Operating lease commitments at 30 June 2019 (note 24)	780
Effect of discounting	(107)
Short-term leases	(3)
Leases of low-value assets	(1)
Other	(5)
Lease liabilities recognised on adoption of IFRS 16 (note 8)	664

A reconciliation of the opening lease liabilities to the opening right-of-use assets is as follows:

	Land and buildings £m	Other assets £m	Total £m
Lease liabilities recognised on adoption of IFRS 16 on 1 July 2019	659	5	664
Transfers from onerous lease provisions (note 18)	(1)	–	(1)
Transfers from accruals	(72)	–	(72)
Transfers from prepayments	14	–	14
Transfers from leasehold property (note 7)	6	–	6
Right-of-use assets recognised on adoption of IFRS 16 on 1 July 2019 (note 8)	606	5	611

Notes to the financial statements continued

1 Basis of preparation continued

New standards and interpretations adopted in the financial year continued

IFRS 16 'Leases' continued

Contracts not in scope of IFRS 16 are those leases as defined under IAS 17 that do not meet the definition of a lease under IFRS 16, principally because the supplier is considered to have substantive substitution rights over the associated asset, the lease term is less than 12 months or the lease relates to low-value assets.

The previously disclosed lease commitments were undiscounted, whilst the IFRS 16 obligations have been discounted based on the Group's incremental borrowing rate. The weighted average incremental borrowing rate applied to lease liabilities on 1 July 2019 was 2.13% for the United Kingdom, 2.95% for the Channel Islands and 5.24% for the Middle East.

Under IAS 17, operating lease commitments included only non-cancellable periods in the lease agreements. Under IFRS 16, the lease term includes periods covered by options to extend the lease where it is reasonably certain that such options will be exercised.

On 1 July 2019, there were no finance leases in the Group. Details of right-of-use assets recognised in the financial year ended 30 June 2020 are disclosed in note 8.

Other standards and interpretations

During the financial year ended 30 June 2020, the Group also adopted Amendments to IFRS 9 'Financial instruments', 'Annual improvements to IFRSs 2015-2017 cycle', Amendments to IAS 19 'Employee Benefits - Plan Amendment, Curtailment or Settlement', Amendments to IAS 28 'Investments in associates' and IFRIC 23 'Uncertainty over income tax treatments'. These changes have not had a material impact on the financial statements.

New standards and interpretations not yet adopted

There are a number of IFRS standards, amendments and IFRIC interpretations that have been issued by the International Accounting Standards Board ('IASB') that will require future adoption but are not expected to have a material impact on the Group:

- Amendments to IFRS 3 'Business Combinations', IFRS 9, IAS 39 and IFRS 7 'Interest Rate Benchmark Reform', IAS 1 and IAS 8 'Definition of material' and References to the Conceptual Framework in IFRS Standards will become effective for the accounting period to 30 June 2021.
- Amendments to IFRS 16 'Leases for COVID-19-Related Rent Concessions' will become effective for the accounting period to 30 June 2021, subject to endorsement.
- Amendments to IFRS 4 'Insurance Contracts' will become effective for the accounting period to 30 June 2022, subject to endorsement.
- Amendments to IAS 1 'Presentation of Financial Statements: Classification of Liabilities as Current or Non-Current' and IFRS 3 'Business Combinations', IAS 16 'Property, Plant and Equipment', IAS 37 'Provisions, Contingent Liabilities and Contingent Assets' and 'Annual improvements to IFRSs 2018-2020 cycle' will become effective for the accounting period to 30 June 2023, subject to endorsement.
- IFRS 17 'Insurance Contracts' will become effective for the accounting period to 30 June 2024, subject to endorsement.

Critical accounting estimates and key judgements

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent assets and liabilities.

The estimates and judgements are continually evaluated and are based on historical experience and other factors, including market data and expectations of future events that are believed to be reasonable and constitute management's best judgement at the date of the financial statements. In the future, actual experience could differ from those estimates and adjustments could be required to the carrying value of assets and liabilities. Where appropriate, present values are calculated using discount rates reflecting the currency and maturity of the items being valued.

Notes to the financial statements continued

1 Basis of preparation continued

Critical accounting estimates and key judgements continued

Set out below is a summary of the critical accounting estimates that could have a significant effect on the Group's financial results:

- Valuation of contract assets (note 13) – estimating the stage of contract completion, including estimating the costs still to be incurred and assessing the likely engagement outcome. A 5% movement in contract assets would result in a change in revenue of £18m.
- Provisions for claims and regulatory proceedings (note 18) – assessing the probable outcome of claims and regulatory proceedings and estimating the level of costs likely to be incurred in defending and concluding such matters.
- Defined benefit schemes (note 22) – determining the actuarial assumptions to be applied in estimating the defined benefit obligation for each scheme, with the key actuarial assumptions being discount rate, inflation and life expectancy.

Set out below is a summary of the key judgements in applying the Group's accounting policies that could have a significant effect on the Group's financial results:

- Revenue recognition (note 2) – assessing the revenue recognition basis for complex client engagements: potentially involving multiple performance obligations and fee types, including identifying the distinct performance obligations in the contract, how the transaction price should be allocated and revenue should be recognised for each.
- Lease term (note 8) – assessing the likelihood of extending the lease term beyond the non-cancellable period, where the Group has the option to extend, or of not exercising a termination option, including considering all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options, and periods after termination options, are only included in the lease term if the lease is reasonably certain to be extended, or not terminated.
- Recognition of defined benefit surplus (note 22) – assessing the extent to which the value of the defined benefit surplus can be recognised in the statement of financial position. In accordance with IAS 19 'Employee Benefits' and IFRIC 14 'The limit on a defined benefit asset, minimum funding requirements', the full value of any calculated surplus is currently recognised as the Group has an unconditional right to refund, assuming the gradual settlement of the schemes' liabilities over time until all members have left the schemes. The IASB published an exposure draft in 2015 to amend IFRIC 14 and, had this amendment been in force in its current form at 30 June 2020, there may have been a significant reduction in the value of the defined benefit surplus recognised.

Further details of significant estimates and judgements are set out in the related notes to the financial statements.

Consolidation

Subsidiary undertakings are entities over which the Group has control. Control is defined as the power to direct the entity's relevant activities, exposure to variable returns from involvement with the entity and the ability to use this power to affect the amount of the returns. Subsidiary undertakings are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases. On consolidation, intercompany transactions, balances and unrealised gains and losses on transactions between Group companies are eliminated. Accounting policies of subsidiary undertakings have been amended, where necessary, to ensure consistency with the policies adopted by the Group.

Foreign currencies

Transactions in foreign currencies are recorded at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated using the rates of exchange at the reporting date and the gains and losses on translation are included in the income statement.

For the purpose of these consolidated financial statements, the results and financial position of each subsidiary undertaking are expressed in sterling, which is the functional currency of the LLP and the presentation currency for the financial statements.

The assets and liabilities of the Group's foreign undertakings are translated at exchange rates prevailing on the reporting date. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising on consolidation on the retranslation of foreign undertakings are recognised in other comprehensive income.

Impairment of non-financial assets

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Non-financial assets, other than goodwill, that have suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Notes to the financial statements continued

2 Revenue

Revenue is measured as the fair value of consideration received or receivable for satisfying performance obligations contained in contracts with clients, including expenses and disbursements but excluding discounts and Value Added Tax. Variable consideration is included in the transaction price only to the extent that it is highly probable that a significant reversal will not be required when the uncertainties determining the level of variable consideration are subsequently resolved. Revenue is recognised when, or as, the Group satisfies performance obligations by transferring control of services to clients. This occurs as follows for the Group's various contract types:

- Time-and-materials contracts are recognised over time as services are provided at the fee rate agreed with the client where there is an enforceable right to payment for performance completed to date.
- Fixed-fee contracts are recognised over time based on the actual service provided to the end of the reporting period as a proportion of the total services to be provided where there is an enforceable right to payment for performance completed to date. This is determined based on the actual inputs of time and expenses relative to total expected inputs.
- Performance-fee contracts are recognised when the right to consideration arises on having met the relevant performance-related elements.
- Contingent-fee contracts, over and above any agreed minimum fee, are recognised when the contingent event occurs and the Group has become entitled to the revenue.
- Licence-fee contracts that provide a right to use the Group's intellectual property ('IP'), as it exists at the date the licence is granted, are recognised when the licence agreement is entered into and the licensee is able to use and benefit from the licence. Licence-fee contracts that provide a right of access to the Group's IP, as it exists throughout the licence period, are recognised over time to reflect the pattern in which the benefits of access transfer to the client over the licence period.

Where contracts include multiple performance obligations, the transaction price is allocated to each performance obligation based on its stand-alone selling price. Where these are not directly observable, they are estimated based on expected cost plus margin. Adjustments are made to allocate discounts proportionately relative to the stand-alone selling price of each performance obligation.

Estimates of revenues, costs or extent of progress toward completion are revised if circumstances change. Any resulting increases or decreases in estimated revenues or costs are reflected in the income statement in the period in which the circumstances that give rise to the revision become known.

For time-and-materials, fixed-fee and licence-fee contracts, fees are usually billed on account based on a payment schedule. For performance-fee and contingent-fee contracts, fees are usually billed and paid when entitlement to the revenue has been established. If the revenue recognised by the Group exceeds the amounts billed, a contract asset is recognised. If the amounts billed exceed the revenue recognised, a contract liability is recognised. Contract assets are reclassified as trade receivables when billed and the consideration has become unconditional because only the passage of time is required before payment is due. The Group's standard payment terms require settlement of invoices within 14 days of receipt.

The Group does not adjust the transaction prices for the time value of money as it does not have any contracts where the period between the transfer of the promised services to the client and the payment by the client exceeds one year.

Notes to the financial statements continued

2 Revenue continued

Disaggregation of revenue

The Group derives revenue from the provision of professional services across the following lines of service and industry segments:

Line of service	2020 £m	2019 £m
Tax	1,071	1,068
Consulting	1,057	950
Audit	1,003	951
Deals	781	773
Risk Assurance	468	491
	4,380	4,233

On 1 July 2019, the Assurance line of service was sub-divided into Audit and Risk Assurance. The 2019 comparatives in the table above have been re-analysed to conform with the new construct.

Industry segment	2020 £m	2019 £m
Financial services	1,473	1,413
Industrial manufacturing and services	726	688
Government and health industries	705	652
Consumer markets	624	638
Technology, information, communications and entertainment	450	442
Energy, utilities and resources	402	400
	4,380	4,233

The table below disaggregates revenue from external clients by managed territory within the Group:

	2020 £m	2019 £m
United Kingdom	3,478	3,460
Middle East	850	723
Channel Islands	52	50
	4,380	4,233

Assets and liabilities related to contracts with customers

Details of the Group's and the LLP's trade receivables and contract assets are disclosed in note 13 and contract liabilities in note 15.

Unsatisfied long-term contracts

At 30 June 2020, the aggregate amount of the transaction price allocated to fixed-price, long-term contracts that were partially or fully unsatisfied was £67m (2019: £44m). Management expects that 84% (£56m) of the transaction price allocated to these unsatisfied contracts will be recognised as revenue in the financial year ending 30 June 2021, 15% (£10m) in the financial year ending 30 June 2022 and the remaining 1% (£1m) in the financial year ending 30 June 2023. In the prior financial year, 89% (£39m) of the transaction price was expected to be recognised as revenue during the financial year ended 30 June 2020, 7% (£3m) in the financial year ending 30 June 2021 and the remaining 4% (£2m) in the financial year ending 30 June 2022. In accordance with IFRS 15, these amounts do not include variable consideration which is constrained. All other contracts with customers are for periods of one year or less, or the right to consideration is directly aligned to the performance completed to date.

Where the contract is for a period of one year or less or where the right to consideration is directly aligned to performance completed to date, the Group has applied the practical expedient set out in IFRS 15 in respect of the presentation of the transaction price allocated to partially or fully unsatisfied contracts with customers.

Notes to the financial statements continued

3 Staff costs

	Group		LLP	
	2020 £m	Restated * 2019 £m	2020 £m	2019 £m
Salaries	1,641	1,514	152	169
Social security costs	154	150	19	21
Pension costs in respect of defined contribution schemes (note 22)	149	132	24	25
Current service cost in respect of end-of-service benefit schemes (note 22)	7	8	–	–
Past service cost in respect of defined benefit schemes (note 22)	–	4	–	4
Guaranteed minimum pension equalisation (note 22)	–	8	–	8
	1,951	1,816	195	227

Salaries include wages and salaries, bonuses, employee benefits and termination benefits.

The Group recognises termination benefits when it is demonstrably committed to terminating the employment of current employees before their retirement or providing termination benefits as a result of voluntary severance. During the financial year ended 30 June 2020, the Group recognised £14m (2019: £9m) and the LLP recognised £4m (2019: £4m) of termination benefits within salaries.

Current service cost in respect of end-of-service benefit schemes of £8m for the prior financial year have been reclassified, these were previously presented within pension costs.

* See note 1 for details regarding the restatement of the Group's comparatives for Middle East end-of-service benefit schemes.

The average monthly number of employees during the financial year was:

	Group		LLP	
	2020 Number	2019 Number	2020 Number	2019 Number
Client support staff	21,205	19,961	822	967
Practice support staff	4,746	4,246	799	841
	25,951	24,207	1,621	1,808

Notes to the financial statements continued

4 Other operating costs

Depreciation, amortisation and impairment of non-financial assets

	2020 £m	2019 £m
Depreciation of right-of-use assets (note 8)	75	–
Depreciation of property, plant and equipment (note 7)	48	45
Amortisation of other intangible assets (note 9)	8	9
Impairment of right-of-use assets (note 8)	4	–
Impairment of goodwill (note 9)	1	2
	136	56

Other operating charges

Other operating charges comprise firmwide overheads including technology and marketing; people-related costs, such as recruitment and training; gains and losses on the disposal of property, plant and equipment and intangible assets; and occupancy costs, including property service charges and lease-related expenditure.

As detailed in note 1, the Group's property leases were accounted for under IAS 17 until 30 June 2019. Up until this date, all operating lease charges were included in other operating charges under the Group's previous accounting policy (see note 8).

On 1 July 2019, the Group adopted the new accounting standard IFRS 16 'Leases'. This has resulted in the recognition of right-of-use assets, which are depreciated, and lease liabilities, which incur finance costs (see note 5). Short-term leases and leases of low-value assets continue to be recognised on a straight-line basis as operating costs.

	2020 £m	2019 £m
Lease charges in accordance with IFRS 16:		
Short-term leases	3	–
Leases of low-value assets	1	–
Operating lease charges in accordance with IAS 17:		
Land and buildings	–	74
Plant and machinery	–	5
	4	79

Details of the Group's total commitments made under non-cancellable operating leases in the prior financial year ended 30 June 2019 are provided in note 24.

Auditor's remuneration

Total fees and expenses payable to the auditor, Crowe U.K. LLP, for the financial year ended 30 June 2020 were £0.5m (2019: £0.5m). This comprised audit fees of £0.4m (2019: £0.4m) relating to the LLP and Group consolidation and other service fees of £0.1m (2019: £0.1m) relating to the audit of subsidiary companies and audit-related assurance.

Notes to the financial statements continued

5 Finance income and expense

	2020 £m	2019 £m
Finance income		
Interest receivable	3	4
Net interest income on defined benefit schemes (note 22)	2	3
	5	7
Finance expense		
Finance charges on lease liabilities (note 8)	(19)	–
Interest payable	(6)	(6)
Unwinding of discount on provisions (note 18)	(2)	(2)
Interest expense on end-of-service benefit schemes (note 22)	(1)	–
	(28)	(8)
Net finance expense	(23)	(1)

6 Tax expense in subsidiary entities

Income tax payable on the profits of the LLP and other LLPs consolidated within the Group is solely the personal liability of the individual members of those LLPs and consequently is not dealt with in these financial statements.

Certain subsidiary entities consolidated in these financial statements are subject to taxes on their own profits and this tax expense is reported in these consolidated financial statements. The tax expense is the sum of the current and deferred tax charges of those entities and is calculated using tax rates that have been enacted or substantively enacted at the reporting date.

Current and deferred taxes are recognised in the income statement, except where they relate to items that are recognised in other comprehensive income, in which case they are recognised in other comprehensive income. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

The tax expense included within the consolidated income statement comprises:

	2020 £m	2019 £m
Current tax on income of subsidiary entities for the financial year	66	59
Deferred tax movements (note 21)	4	1
Tax expense in subsidiary entities	70	60

The following table reconciles the tax expense at the standard rate to the actual tax expense:

	2020 £m	2019 £m
Profit on ordinary activities of subsidiary entities before tax	318	289
Tax expense at UK standard rate of 19% (2019: 19%)	60	55
Impact of items not deductible for tax purposes	3	3
Adjustments to tax charge in respect of prior financial years	9	–
Effect of different tax rates across the Group	(2)	2
	70	60

Notes to the financial statements continued

7 Property, plant and equipment

Net book amount at end of prior financial year	2	66	114	182
Net book amount at end of financial year	2	67	115	184

Property, plant and equipment is measured at cost less accumulated depreciation and any recognised impairment loss. Depreciation is primarily provided on a straight-line basis from the point the asset is available for use over the following estimated useful economic lives:

Freehold property	50 years
Leasehold property	50 years or shorter leasehold term
Fittings and furniture	10-20 years or shorter leasehold term
Equipment	2-5 years

Repairs and maintenance costs arising on property, plant and equipment are charged to the income statement as incurred.

Group capital commitments relating to property, plant and equipment contracted but not provided for at 30 June 2020 amounted to £34m (2019: £7m). Assets under construction of £1m (2019: £13m) are included within leasehold property and £12m (2019: £15m) within fittings, furniture and equipment. The capital commitments contracted but not provided for and assets under construction relate principally to the fit-out of office accommodation.

LLP

During the financial year ended 30 June 2020, there were no property, plant or equipment assets or capital commitments within the LLP (2019: nil).

Notes to the financial statements continued

8 Leases

Group

Accounting policies applied from 1 July 2019

Leases are recognised as right-of-use assets and corresponding lease liabilities at the date at which the leased assets are available for use by the Group.

Lease liabilities are initially measured at an amount equal to the present value of the expected future lease payments for the underlying right-of-use assets during the lease term. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined, or the Group's relevant incremental borrowing rate. The lease term is a non-cancellable period of the lease; periods covered by options to extend and terminate the lease are only included in the lease term if it is reasonably certain that the lease will be extended or not terminated.

Each lease payment is allocated between a repayment of the liability and a finance cost. Lease liabilities are subsequently measured using the effective interest method. The carrying amount of the liability is remeasured to reflect reassessments and lease modifications.

Movements in the lease liabilities during the financial year ended 30 June 2020 were as follows:

	Total £m
Balance at beginning of financial year	–
Recognised on adoption of IFRS 16 on 1 July 2019 (note 1)	664
Exchange differences	1
Additions	252
Finance charges (note 5)	19
Payments	(84)
Balance at end of financial year	852

Disclosed as:

	2020 £m	2019 £m
Current	75	–
Non-current	777	–
	852	–

The maturity profile at 30 June 2020 of the undiscounted future cash flows required to settle the lease liabilities is as follows:

	£m
Within one financial year	77
1–2 financial years	75
2–3 financial years	75
3–4 financial years	75
4–5 financial years	73
More than five financial years	539
	914

During the financial year ended 30 June 2020, total cash outflows in respect of leases was £88m, including £4m on short-term leases and leases of low-value assets.

Details of the Group's total commitments made under non-cancellable operating leases in the prior financial year to 30 June 2019 are provided in note 24. A reconciliation of these total commitments to the lease liability recognised on 1 July 2019 is provided in note 1.

Notes to the financial statements continued

8 Leases continued

Right-of-use assets are measured initially at cost comprising:

- the amount of the initial measurement of the lease liability;
- any lease payments less lease incentives at or before the lease commencement date;
- any initial direct costs; and
- restoration costs.

Subsequently, the right-of-use assets are measured at cost less accumulated depreciation and any accumulated impairment losses, and adjusted for remeasurements of the lease liability due to reassessments or lease modifications. The right-of-use assets are depreciated over the lease term on a straight-line basis.

Payments associated with all short-term leases and certain leases of low-value assets are recognised on a straight-line basis as an operating expense in the income statement (see note 4). Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise office-related and technology equipment.

Movements in the right-of-use assets were as follows:

	Land and buildings £m	Other assets £m	Total £m
Cost			
At beginning of financial year	–	–	–
Recognised on adoption of IFRS 16 on 1 July 2019 (note 1)	606	5	611
Exchange differences	1	–	1
Additions	246	6	252
Disposals	(2)	(1)	(3)
At end of financial year	851	10	861
Accumulated depreciation/impairment			
At beginning of financial year	–	–	–
Depreciation charge for the financial year	71	4	75
Impairment charge for the financial year	4	–	4
Disposals	(2)	(1)	(3)
At end of financial year	73	3	76
Net book amount at beginning and end of prior financial year	–	–	–
Net book amount at end of financial year	778	7	785

Accounting policies applied until 30 June 2019

All leases in which a significant portion of the risks and rewards of ownership were retained by the lessor were classified as operating leases and the related rental expenses were charged to the income statement on a straight-line basis over the period of the lease, with any lease incentives also being recognised on a straight-line basis over the lease term as a reduction of the rental expense.

LLP

During the financial year ended 30 June 2020, there were no right-of-use assets or lease liabilities held by the LLP.

9 Goodwill and other intangible assets continued

Acquisitions and goodwill

The acquisition method of accounting is used to account for business combinations by the Group. The consideration transferred for the acquisition of a subsidiary undertaking is the fair value of the assets transferred and the liabilities incurred by the Group, including those from any contingent consideration arrangement. Acquisition related costs are charged to the income statement as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are initially measured at their fair values at the acquisition date.

Goodwill arises where the fair value of the consideration transferred for a business exceeds the fair value of identifiable assets, liabilities and contingent liabilities. If the consideration is less than the fair value of the identifiable assets, in the case of a bargain purchase, the difference is recognised immediately in the income statement. Goodwill arising on acquisitions is capitalised with an indefinite useful economic life and tested annually for impairment. Assets are grouped at the lowest levels for which there are separately identifiable cash flows ('cash generating units'). For the purposes of assessing impairment, goodwill is allocated to the group of cash generating units which represents the lowest level at which goodwill is monitored for internal management purposes.

Impairment reviews

The largest element of goodwill held within the Group is £54m (2019: £53m) in respect of the Group's strategic alliance in the Middle East. The recoverable amount for goodwill has been determined based on value in use, being the present value of future cash flows based on two-year financial budgets, including the anticipated impact of COVID-19 on revenues and the cost base. Cash flows for the periods beyond existing budgets have been extrapolated using a 3% long-term GDP annual regional growth rate (2019: 5%). The discount rate applied against the anticipated future cash flows is based on a pre-tax estimated weighted average cost of capital of 11% (2019: 12%).

The remaining goodwill represents UK acquisitions and relates primarily to the provision of consulting services. The discount rate applied against the anticipated future cash flows is based on a pre-tax estimated weighted average cost of capital of 12% (2019: 12%). During the financial year ended 30 June 2020, impairment charges of £1m were recognised against this goodwill in relation to a business acquired in a prior financial year, having given consideration to its value in use, and an acquired business that had ceased trading. During the prior financial year ended 30 June 2019, impairment charges of £2m were recognised against goodwill in relation to two businesses acquired in prior financial years, having given consideration to their value in use.

A reasonable change in the key assumptions used in assessing the goodwill for impairment would not have a significant impact on the difference between value in use and the carrying value.

Customer relationships

Customer relationships recognised on the acquisition of a business are initially measured at fair value and amortised on a straight-line basis over the expected useful economic life of the relationship, typically three to ten years.

Computer software

Costs directly associated with the purchase or development of computer software are stated at cost less accumulated amortisation and amortised on a straight-line basis over the expected useful economic life of the software, typically three to five years.

Costs directly attributable to the development of identifiable software are recognised as intangible assets only if development costs can be reliably measured, the product or process is technically and commercially feasible, future economic benefits are probable, and the Group has adequate resources available to complete the development and use or sell the software. Directly attributable costs that are capitalised as part of the asset include employee costs and an appropriate portion of direct overheads. Other development expenditures that do not meet these criteria are recognised as an expense as incurred.

Expenditure on research and costs associated with maintaining computer software are recognised as an expense as incurred.

Notes to the financial statements continued

10 Investments in subsidiaries

LLP

	2020 £m	2019 £m
Shares in subsidiary undertakings		
Cost at beginning and end of financial year	68	68
Accumulated impairment at beginning and end of financial year	11	11
Net book amount at end of prior financial year	57	57
Net book amount at end of financial year	57	57

Investments in subsidiaries are measured at cost less impairment.

The financial statements consolidate the results and financial position of the Group, including all subsidiary undertakings listed in note 27.

Non-controlling interests in subsidiary undertakings

The non-controlling interest profits attributable to the individuals who are members of PricewaterhouseCoopers CI LLP and to the Middle East partners of PricewaterhouseCoopers (Middle East Group) Limited are shown as non-controlling interests in the consolidated financial statements.

PricewaterhouseCoopers (Middle East Group) Limited is the only subsidiary with a non-controlling interest that is material to the Group. The Group owns 100% of the ordinary shares of PricewaterhouseCoopers (Middle East Group) Limited and the local Middle East partners own 'B' shares, which provide the partners with certain income access rights.

The pre-consolidated reserves of this company and its subsidiaries at 30 June 2020 attributable to non-controlling interests showed a deficit of £20m (2019: £29m). At 30 June 2020, the local partners had also provided capital loans totalling £11.6m (2019: £96m).

Notes to the financial statements continued

11 Interests in joint ventures and associates

	2020 £m	2019 £m
Value at beginning of financial year	3	3
Share of profit (loss)	1	(1)
Capital investment	1	2
Distributions received	(2)	(1)
Value at end of financial year	3	3

The Group's interests in joint ventures and associates are consolidated using the equity method of accounting. The investment is initially recognised at cost and the carrying value adjusted to recognise the Group's share of the profit or loss of the joint venture or associate after the date of acquisition. The Group's share of profit or loss is recognised in the income statement with a corresponding adjustment to the carrying value of the investment.

The Group held interests in the following four joint ventures and associates at 30 June 2020: Perfect Ward Limited (formerly Bolt Partners Limited), which offers mobile applications for healthcare organisations; PricewaterhouseCoopers Mobility Technology Services LLC, which offers international mobility services; PricewaterhouseCoopers Service Delivery Centre Holdings (Katowice) B.V., which provides shared services for PwC network firms; and PwC Poland Services Limited, which offers specialised cloud-based solutions and transformational services. These joint ventures are not material to the Group.

The Group also holds repayable interest-bearing preference shares issued by PwC Poland Services Limited, which are recognised as debt instruments within other investments (refer to note 12).

During the prior financial year, the Group disposed of its 20% equity interest in Skyval Holdings LLP with no gain or loss recognised on disposal.

All joint ventures and associates are listed in note 27.

12 Other investments

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Reservoir trust restricted assets	51	41	51	41
Other investments held at amortised cost	43	52	6	6
Other investments held at fair value through profit and loss	20	20	14	15
	114	113	71	62

Other investments are measured at amortised cost less impairment where the investment is held to collect contractual cash flows that represent solely payments of principal and interest. Otherwise, they are measured at fair value. Income from investments is recognised in the income statement when entitlement is established.

Notes to the financial statements continued

12 Other investments continued

Reservoir trust restricted assets

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Value at beginning of financial year	41	30	41	30
Remeasurement on adoption of IFRS 9 on 1 July 2018	–	1	–	1
Additions	10	10	10	10
Value at end of financial year	51	41	51	41

The LLP has entered into a deed with the trustees of its two defined benefit pension schemes establishing a reservoir trust. Under the terms of the deed, the assets in the reservoir trust are restricted and are reserved to be used to meet any deficit, calculated in accordance with the terms of the deed, in the schemes at 31 March 2026, being the end of the trust term, or earlier if certain triggers are met. The trust assets will only be available to the LLP to the extent that they are not needed to meet any deficit in the schemes at that date. Notwithstanding these conditions, the trust assets do not constitute plan assets under IAS 19 and are therefore presented as restricted assets within other investments.

During the financial year ended 30 June 2020, the LLP made contributions into the trust of £10m (2019: £10m). The LLP has committed to contribute up to £10m per annum over the next two financial years and currently expects to contribute £10m in the financial year ending 30 June 2021.

On 1 July 2018, the reservoir trust restricted assets, which were previously classified as available-for-sale and measured at fair value under IAS 39, were reclassified as held at amortised cost on the adoption of IFRS 9, resulting in the release to members' reserves of £1m of cumulative fair value losses previously recognised on these assets.

Reservoir trust restricted assets are considered to have a low credit risk and the loss allowance is therefore limited to the 12 month expected credit loss. The Group and the LLP have assessed the expected credit loss on reservoir trust restricted assets and no loss allowance has been recognised in the financial year ended 30 June 2020 (2019: nil).

Other investments held at amortised cost

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Value at beginning of financial year	52	43	6	6
Additions	5	7	–	–
Redemption of investments	(15)	–	–	–
Foreign-exchange movements recognised in profit and loss	1	2	–	–
Value at end of financial year	43	52	6	6

During the financial year ended 30 June 2020, the Group invested in an additional £3m (2019: £5m) and received a £12m redemption (2019: nil) of repayable interest-bearing subordinated loan notes issued by an entity in the PwC global network. At 30 June 2020, the Group's total investment in repayable interest-bearing subordinated loan notes from entities in the PwC global network, after foreign-exchange movements, was £33m (2019: £41m), which are primarily denominated in US dollars with £8m in euros (2019: £8m). At 30 June 2020, the LLP held £6m of these loans, denominated in euros (2019: £6m).

During the financial year ended 30 June 2020, the Group also invested in an additional £2m (2019: £2m) and received a £3m redemption (2019: nil) of repayable interest-bearing preference shares issued by PwC Poland Services Limited. At 30 June 2020, the Group's total investment in these preference shares was £10m, denominated in euros (2019: £11m).

The amortised cost of the repayable interest-bearing subordinated loan notes and preference shares are calculated as the present value of the expected future cash flows from these instruments, discounted at a market rate of interest.

The repayable interest-bearing subordinated loan notes and preference shares are considered to have a low credit risk and the loss allowance is therefore limited to the 12 month expected credit loss. The Group and the LLP have assessed the expected credit loss on these assets and no loss allowance has been recognised in the financial year ended 30 June 2020 (2019: nil).

Notes to the financial statements continued

12 Other investments continued

Other investments held at fair value through profit and loss

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Value at beginning of financial year	20	21	15	15
Additions	–	1	–	1
Redemption of investments	(2)	–	(2)	–
Remeasurement gains (losses) recognised in profit and loss	2	(2)	1	(1)
Value at end of financial year	20	20	14	15

At 30 June 2020, the LLP held preference shares in the PwC Central and Eastern European firm of £11m (2019: £12m) and equity investments in entities in the PwC global network of £3m (2019: £3m). At 30 June 2020, other entities in the Group held preference shares in the PwC Central and Southern African firm of £5m (2019: £4m) and equity investments in entities in the PwC global network of £1m (2019: £1m). Both preference share investments are denominated in US dollars.

The preference shares held in the PwC Central and Eastern European and PwC Central and Southern African firms are carried at fair value, being the present value of future returns received mainly in the form of a coupon rate of return and through additional referred client work. The key assumptions used are the average annual growth rate and discount rate applied against the anticipated future returns. A reasonable change in the key assumptions used in assessing the fair values would not have had a significant impact on the carrying value.

During the financial year ended 30 June 2020, the Group and the LLP benefitted from the redemption of £2m (2019: nil) of the preference shares held in the PwC Central and Eastern European firm and recognised remeasurement gains of £1m (2019: remeasurement losses of £1m) in the income statement against these investments. In the prior financial year ended 30 June 2019, the Group and the LLP invested in an additional £1m of preference shares.

During the financial year ended 30 June 2020, the Group recognised remeasurement gains of £1m (2019: remeasurement losses of £1m) in the income statement on the preference shares held in the PwC Central and Southern African firm. At 30 June 2020, the Group has committed, subject to certain investment conditions, to make additional payments of up to US \$16m (2019: US \$16m).

The fair values of investments in entities in the PwC global network have been determined using the dividend discount model. The key assumption used is the discount rate applied against anticipated future returns. A reasonable change in the key assumption used in assessing the fair values would not have had a significant impact on the carrying value.

Notes to the financial statements continued

13 Trade and other receivables

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Client receivables	802	793	517	549
Due from PwC network firms	84	81	73	63
Trade receivables	886	874	590	612
Contract assets	364	462	275	378
Trade receivables and contract assets	1,250	1,336	865	990
Amounts due from subsidiary undertakings	–	–	21	56
Other receivables	31	38	6	3
Prepayments	42	66	2	3
	1,323	1,440	894	1,052

Group and LLP trade receivables and contract assets are carried at amortised cost less provisions for lifetime estimated credit losses and impairments. Estimated future credit losses are first recorded on the initial recognition of a receivable and are based on the ageing of the receivable balance, historical credit loss experience and forward-looking considerations. Individual trade receivables and contract assets are written off when management deem them not to be collectible. Further details on credit risk are disclosed in note 25.

Contract assets are reclassified as trade receivables when billed to clients and the consideration has become unconditional because only the passage of time is required before payment is due.

The expected loss rates for trade receivables and contract assets, as presented below, are based on the payment profile and the shared credit risk characteristics arising in the different regions and industries in which the Group operates. The Group has incorporated forward-looking information based on the clients' industries and financial position, including the assessment of any perceived impact of COVID-19.

		30 days or less	31 to 90 days	91 to 180 days	181 to 270 days	271 to 365 days	More than 366 days

Other impairment provisions	(9)	(2)	(3)	(2)
	(62)	(45)	(20)	(15)
Trade receivables and contract assets	1,250	1,336	865	990

Notes to the financial statements continued

13 Trade and other receivables continued

Movements in lifetime expected credit losses and other impairment provisions on trade receivables and contract assets were as follows:

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Balance at beginning of financial year	(45)	(37)	(15)	(16)
Remeasurement on adoption of IFRS 9 on 1 July 2018	-	1	-	-
Income statement:				
Charge for the financial year	(44)	(24)	(14)	(5)
Released unused during the financial year	17	9	5	1
Utilised during the financial year	10	6	4	5
Balance at end of financial year	(62)	(45)	(20)	(15)

On adoption of IFRS 9 'Financial instruments' on 1 July 2018, the Group did not restate comparative information, instead adjusting opening reserves for the cumulative impact of the change to the new standard. This comprised an increase in opening reserves of £1m for the Group relating to the introduction of the new expected credit loss impairment model.

Amounts due from subsidiary undertakings are considered to have a low credit risk and the loss allowance is therefore limited to the 12 month expected credit loss. The LLP has assessed the expected credit loss on these assets and no loss allowance has been recognised in the financial year ended 30 June 2020 (2019: nil).

The other classes of assets within trade and other receivables do not contain impaired assets.

The carrying value of trade and other receivables in the Group and the LLP is consistent with fair value in the current and prior financial year.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above. The Group does not hold any collateral as security.

14 Cash and cash equivalents

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Cash at bank and in hand	69	43	9	6
Short-term deposits	455	246	383	246
Total cash and cash equivalents	524	289	392	252

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Fair values of cash and cash equivalents approximate to carrying value owing to the short maturity of these instruments.

Bank overdrafts are included within borrowings, in current liabilities, in the statement of financial position. For the purpose of the statement of cash flows, cash and cash equivalents are presented net of outstanding bank overdrafts as follows:

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Total cash and cash equivalents as above	524	289	392	252
Bank overdrafts (note 16)	-	(7)	-	-
	524	282	392	252

Amounts owed to subsidiary undertakings	–	–	552	546
Social security and other taxes	122	118	8	7
Other payables	65	63	48	45
Accruals	348	448	37	48
Contract liabilities	243	169	160	112
	922	974	805	758

Trade and other payables are measured at amortised cost.

During the financial year ended 30 June 2020, £156m of the Group's £169m and £100m of the LLP's £112m recorded contract liabilities at 30 June 2019 were recognised as revenue. During the prior financial year ended 30 June 2019, £142m of the Group's £151m and £102m of the LLP's £111m recorded contract liabilities at 30 June 2018 were recognised as revenue.

Due to the short maturity of trade and other payables in the Group and the LLP, the carrying value is consistent with fair value in the current and prior financial year. Group current trade payables include amounts owing to PwC network firms totalling £122m (2019: £134m).

* See note 1 for details regarding the restatement of the Group's comparatives.

16 Borrowings

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Bank borrowings	83	40	–	–
Bank overdrafts	–	7	–	–
	83	47	–	–

Borrowings are initially measured at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds, net of transaction costs, and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs and charged to the income statement from draw-down. Where there is no evidence that any of the facility will be drawn down, the fee is charged to the income statement over the period of the facility.

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Current	11	47	–	–
Non-current	72	–	–	–
	83	47	–	–

The Group's borrowings at 30 June 2020 and 30 June 2019 were unsecured and denominated in US dollars. Borrowings are subject to floating interest rates, partially swapped to a fixed rate through the use of interest rate swap agreements, and are repayable within five financial years, with no repayments due until March 2021.

The Group has complied with the financial covenants of its borrowing facilities during the current and prior financial year.

The carrying values of borrowings approximate their fair value.

Further details of the Group's exposure to financial risks arising from borrowings are set out in note 25.

Notes to the financial statements continued

17 Liabilities arising from financing activities

The Group's and the LLP's liabilities arising from financing activities were as follows:

	Group		LLP	
	2020 £m	2019 £m	2020 £m	2019 £m
Bank borrowings (note 16)	83	40	–	–
Lease liabilities (note 8)	852	–	–	–

Notes to the financial statements continued

18 Provisions and contingent liabilities continued

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Non-current provisions are measured at their present value. The discount rates used are based on risk-free rates.

Annuities

The Group's financial statements consolidate the provision made for the annuities payable by certain subsidiary undertakings to current and former partners in those undertakings, principally in relation to the Middle East. These annuities are unfunded. The provision reflects the present value of the obligations arising from service to date. Any changes in the provision for these annuities arising from changes in entitlements, financial estimates or actuarial assumptions are recognised in the income statement. The unwinding of the discount is presented in the income statement as a finance expense. When the entitled individuals retire and their annuities come into payment, these payments are shown as a movement against the provision.

The principal actuarial assumptions used in calculating the annuities provision are an assumed retirement age of 57 (2019: 57), discount rates of 3.5% for US dollar denominated annuities (2019: 4.5%) and 0.7% for sterling denominated annuities (2019: 1.2%), and inflation rates of 2.0% for US dollar denominated annuities (2019: 2.3%) and 2.5% for sterling denominated annuities (2019: 3.2%). The annuities provision is expected to unwind over 28 years.

Members of the LLP are required to make their own provision for pensions and do so mainly through contributions to personal pension policies and other appropriate investments. Members, in their capacity as partners in the PricewaterhouseCoopers United Kingdom Partnership, have agreed to pay pension annuities and other post-retirement payments to certain former partners of that partnership and the surviving spouses and dependants of deceased former partners. These annuities and other post-retirement payments are personal obligations of the individuals and are not obligations of, or guaranteed by, the LLP or its subsidiary undertakings. Accordingly, these annuities are not recognised within these financial statements.

Property

Provisions are recognised for obligations under property contracts that are onerous ('onerous provision') and to restore premises to their original condition upon vacating them where such an obligation exists under the lease ('dilapidations provision'). The provisions are based on estimated future cash flows that have been discounted to present value, with the unwinding of the discount presented in the income statement as a finance expense.

Property provisions at 30 June 2020 and 30 June 2019 comprise substantially dilapidations provisions. The provisions are based on estimated future cash flows that have been discounted to present value at an average rate of 1.5% (2019: 2.1%). The property provisions are expected to unwind over 20 years.

From the adoption of IFRS 16 'Leases' on 1 July 2019, the onerous provision covers the estimated unavoidable non-rental costs of leased properties, including rates and service charges, up to the end of the lease term. Up to 30 June 2019, the onerous provision also covered the rental costs of such properties to the end of the lease term, after allowing for existing or expected sublet rental income. On 1 July 2019, the onerous provision for these rental costs was offset against the right-of-use asset recognised on transition to IFRS 16 (see note 1).

Claims and regulatory proceedings

In common with comparable professional service practices, the Group is involved in a number of disputes in the ordinary course of business which may give rise to claims by clients or investigations commenced by regulatory bodies which may lead to regulatory proceedings. The Group defends such claims where appropriate and where costs are likely to be incurred in defending and concluding such matters and can be measured reliably they are provided for in the financial statements. Amounts provided for are based on management's assessment of the specific circumstances in each case and after considering any insurance cover, where deemed recoverable. The Group carries professional indemnity insurance and no separate disclosure is made of the detail of such claims or proceedings, or the costs recovered by insurance, as to do so could seriously prejudice the position of the Group. Claims are assessed as being settled in full within the next five years.

Notes to the financial statements continued

18 Provisions and contingent liabilities continued

Contingent liabilities

Contingent liabilities are possible obligations whose existence depends on the outcome of uncertain future events or present obligations where the outflow of resources is considered less than probable or cannot be measured reliably. Contingent liabilities are not recognised in the financial statements but are disclosed unless they are remote. In line with the policy above, details of contingent liabilities relating to claims and regulatory proceedings are not disclosed.

Financial guarantee contracts are initially recognised at fair value, which is calculated as the present value of the difference between the net contractual cash flows required under the debt instrument being guaranteed, and the net contractual cash flows that would have been required without the guarantee. Financial guarantees are subsequently measured at the higher of their initial fair value less cumulative amortisation, and the best estimate of the loss allowance determined in accordance with the expected credit loss model. The carrying value of the financial guarantees disclosed below is nil (2019: nil).

The Group has provided a financial guarantee to an entity in the PwC network. This is considered to have a low credit risk and the loss allowance is therefore limited to the 12 month expected credit loss. No loss allowance has been recognised in the financial year ended 30 June 2020 (2019: nil).

The Group has entered into US \$57m (2019: US \$49m) of guarantees with third-party banks in connection with work performed in foreign territories, predominantly in the Middle East.

The LLP has entered into a US \$52m (2019: US \$52m) loan guarantee with a third-party bank in connection with a loan to an entity in the PwC global network. The Group has also entered into, subject to certain conditions, other cross guarantees and indemnities in respect of other entities in the PwC network. In line with the above policy, these are considered remote.

The LLP has provided guarantees in respect of the future lease commitments of PricewaterhouseCoopers Services Limited, a subsidiary company, totalling £567m over the remaining lease terms (2019: £559m). The majority of these commitments relate to the office premises at 7 More London and 1 Embankment Place.

The LLP guarantees the bank borrowings of PricewaterhouseCoopers Services Limited, which are included in the Group's statement of financial position. At 30 June 2020, PricewaterhouseCoopers Services Limited's bank borrowings were nil (2019: nil).

Notes to the financial statements continued

19 Members' capital

	Group and LLP £m
Balance at beginning of prior financial year	266
Contributions by members	24
Repayments to members	(27)
Balance at end of prior financial year	263
Contributions by members	36
Repayments to members	(22)
Balance at end of financial year	277

Capital attributable to members retiring within one financial year is shown as current as it will be repaid within 12 months of the reporting date. Total members' capital analysed by repayable dates is as follows:

	Group and LLP 2020 £m	Group and LLP 2019 £m
Current	19	14
Non-current	258	249
	277	263

Members' capital is classified as a financial liability. The carrying value of members' capital is consistent with its fair value in the current and prior financial year.

Members' capital contributions are determined by the Executive Board, with the approval of the Supervisory Board, having regard to the working capital needs of the business. Individual member's capital contributions are set by reference to equity unit profit share proportions and are not repayable until the member retires. Members are required to provide up to 12 months' notice of retirement.

20 Other non-current liabilities

The Group's other non-current liabilities of £118m (2019: £98m) represent capital loans provided by non-controlling interest partners in subsidiary undertakings consolidated into the Group, primarily in relation to the Middle East. Non-controlling interest partners are required to provide 12 months' notice of retirement.

There were no other non-current liabilities in the LLP for the financial years ended 30 June 2020 and 30 June 2019.

Notes to the financial statements continued

21 Deferred tax

The movements in the Group's net deferred tax balance during the financial year were as follows:

	2020 £m	2019 £m
Balance at beginning of financial year	3	4
Charged to the income statement	(7)	(2)
Credited to the income statement	3	1
Balance at end of financial year	(1)	3

Deferred tax assets and liabilities are recognised using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and the corresponding tax bases used in the computation of taxable profit. Temporary differences relating to investments in subsidiaries are only provided for to the extent that it is probable that they will reverse in the foreseeable future. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset related current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Deferred tax is measured at the tax rates that are enacted or substantively enacted at the reporting date and expected to apply in the periods in which the temporary differences reverse. Deferred tax assets in the current and prior financial year are calculated using a tax rate of 19%. Deferred tax liabilities in the current and prior financial year are calculated using the rates prevailing in the relevant jurisdictions.

At 30 June 2020, deferred tax assets primarily comprised temporary differences between capital allowances and depreciation and deferred tax liabilities primarily comprised other temporary timing differences.

Disclosed as:

	2020 £m	2019 £m
Deferred tax assets	8	5
Deferred tax liabilities	(9)	(2)
	(1)	3

At 30 June 2020, the Group had accumulated unrecognised tax losses of £46m (2019: £47m). Deferred tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable.

There was no deferred tax arising in the LLP for the financial years ended 30 June 2020 and 30 June 2019.

Notes to the financial statements continued

22 Retirement benefits

Defined contribution schemes

The Group's contributions to defined contribution schemes are charged to the consolidated income statement as they fall due. Costs of £149m (2019: *restated* £132m) were recognised by the Group and £24m (2019: £25m) by the LLP in respect of the schemes.

Defined benefit schemes

The Group's two defined benefit schemes in the United Kingdom are the PwC Pension Fund ('the Fund') and the DH&S Retirement and Death Benefits Plan ('the Plan'). Both of the Group's defined benefit scheme arrangements are closed to future service accrual, although certain current employee member benefits remain linked to final salary. Both schemes are funded and their assets are held separately from those of the Group. The liabilities arising in the defined benefit schemes have been assessed for accounting purposes using the projected unit credit method and 31 March 2017 individual member data, with allowance for transfers out since this date, rolled forward to the reporting date.

The net surplus or deficit in each scheme is calculated in accordance with IAS 19, based on the present value of the defined benefit obligation at the reporting date, less the fair value of the scheme assets.

The consolidated income statement includes interest on the net defined benefit asset or obligation. Past service costs arising from changes to scheme benefits are recognised immediately in the consolidated income statement, unless the benefits are conditional on the employees remaining in service for a specified period of time, in which case the past service costs are amortised over the vesting period.

Actuarial gains and losses are recognised in full in other comprehensive income in the financial period in which they arise. Other income and expenses associated with the defined benefit schemes are recognised in the consolidated income statement.

Assumptions

The principal actuarial assumptions used for the purposes of these financial statements are:

	2020	2019	2018
Discount rate	1.4%	2.2%	2.6%
Inflation (RPI)	3.1%	3.4%	3.3%
Inflation (CPI)	2.1%	2.4%	2.3%
Expected rate of increase in salaries	2.1%	2.4%	2.3%
Expected average rate of increase in pensions in payment	2.5%	2.6%	2.5%

The majority of liabilities for the Fund and the Plan are indexed on an RPI basis, while further increases to deferred member pensions before retirement increase using CPI.

Notes to the financial statements continued

22 Retirement benefits continued

Defined benefit schemes continued

Sensitivity analysis

The following table shows the sensitivity of the present value of the defined benefit obligations to changes in each of the individual principal actuarial assumptions:

	2020			2019		
	Fund obligation increase £m	Plan obligation increase £m	Total obligation increase £m	Fund obligation increase £m	Plan obligation increase £m	Total obligation increase £m
0.5% decrease to discount rate	161	89	250	144	80	224
0.5% increase to salary increases	3	1	4	2	1	3
0.5% increase to inflation	78	45	123	68	39	107
One year increase to life expectancy	74	40	114	61	33	94

The figures at 30 June 2020 used in these financial statements assume that the mortality of the schemes' members will be in line with nationally published S2PA mortality tables, adjusted to reflect the longer life expectancy of the schemes' members versus the standard table by a 91% scaling factor for both males and females. Future improvements are assumed to be in line with Continuous Mortality Investigation ('CMI') 2019 projections, with a 1.25% long-term rate, a smoothing parameter of 7.0 and an initial addition to mortality improvements of 0.5% p.a..

The following table illustrates the life expectancy for a current pensioner member aged 65 at 30 June and a future pensioner member aged 45 at 30 June:

	2020		2019	
	Fund Years	Plan Years	Fund Years	Plan Years
Life expectancy of current pensioners at age 65:				
Male	22.8	22.8	22.6	22.6
Female	24.7	24.7	24.5	24.5
Life expectancy of future pensioners at age 65:				
Male	24.1	24.1	24.0	24.0
Female	26.2	26.2	26.0	26.0

Income statement

The amounts recognised in the consolidated income statement are as follows:

	2020			2019		
	Fund £m	Plan £m	Total £m	Fund £m	Plan £m	Total £m
Net interest income	1	1	2	2	1	3
Guaranteed minimum pension equalisation	–	–	–	(5)	(3)	(8)
Past service cost	–	–	–	(4)	–	(4)
	1	1	2	(7)	(2)	(9)

On 26 October 2018, the High Court issued a ruling on the equalisation of guaranteed minimum pension benefits ('GMPs'), clarifying that pension scheme trustees are under a duty to equalise GMPs between members of different sexes and setting out a number of different lawful methods for affecting the equalisation. Using the C2 methodology, set out in the judgement, the overall financial impact of equalisation as at the judgement date is estimated to be £8m (Fund: £5m, Plan: £3m) on an IAS 19 basis, equating to 0.3% of the combined schemes' liabilities. This charge was recognised as a past service cost in the consolidated income statement in the prior financial year ended 30 June 2019.

Pensions accrued prior to 6 April 1997 are not required by statute to increase in payment and most such pensions in the Fund have no entitlement to increases. During the prior financial year ended 30 June 2019, the LLP's management chose to apply a 2% increase to this element of pension for all applicable pensioners in the Fund. The impact of this discretionary increase was £4m on an IAS 19 basis as at the date of application, which was recognised as a past service cost in the consolidated income statement in the prior financial year ended 30 June 2019.

Notes to the financial statements continued

22 Retirement benefits continued

Defined benefit schemes continued

Scheme assets and defined benefit obligations continued

Contributions paid during the financial year ended 30 June 2020 included £25m (2019: £25m) of deficit reduction contributions and £3m (2019: £2m) of other funding costs. Contributions in the prior financial year ended 30 June 2019, also included contributions in respect of the discretionary pension increase of £4m.

The LLP has entered into an agreement with the schemes' trustees to establish a reservoir trust. The LLP made contributions of £10m during the financial year ended 30 June 2020 (2019: £10m) and, if relevant conditions are met, the LLP expects to contribute £10m in the financial year ending 30 June 2021. Further details are provided in note 12.

The actual return on scheme assets during the financial year ended 30 June 2020 was an increase of £249m (2019: £187m). The allocation and market value of assets of the defined benefit schemes were as follows:

	2020			2019		
	Fund £m	Plan £m	Total £m	Fund £m	Plan £m	Total £m
Bonds	961	539	1,500	785	444	1,229
Gilts	590	323	913	645	341	986
Multi-asset/hedge funds	200	110	310	210	116	326
Cash	101	54	155	103	60	163
Derivative financial instruments	(1)	(1)	(2)	(6)	(3)	(9)
Total scheme assets	1,851	1,025	2,876	1,737	958	2,695
Defined benefit obligations	(1,847)	(991)	(2,838)	(1,704)	(909)	(2,613)
Net retirement benefit assets	4	34	38	33	49	82

Both the Fund and the Plan have significant liability driven investments ('LDI'), the purpose of which is to reduce exposure to changes in interest rates and inflation. The LDI holdings primarily comprise fixed interest and inflation linked gilts, repurchase and reverse repurchase holdings in these gilts and interest rate and inflation swaps.

Within derivative financial instruments are foreign-exchange contracts, the purpose of which is to reduce the exposure of bonds and multi-asset/hedge funds denominated in US dollars to changes in foreign-exchange.

Future cash funding

The Fund and the Plan are valued formally every three years by an independent actuary, Mercer Ltd. The most recent finalised full actuarial valuations for both the Fund and the Plan were at 31 March 2017. These valuations were conducted under the Scheme Funding Regulations (Pensions Act 2004) and indicated a combined deficit of £240m on a fully funded valuation basis.

In agreement with the schemes' trustees, the Group has agreed to continue to make deficit reduction payments of £25m per annum over the period from 1 April 2017 to 31 March 2024. The Group therefore currently expects to contribute £25m in the financial year ending 30 June 2021, in addition to the expected £10m of contributions to the reservoir trust, provided the relevant conditions are met, as described in note 12. The next full actuarial valuation will be carried out with an effective date of 31 March 2020 and will be finalised in the financial year to 30 June 2021.

End-of-service benefit schemes

During the financial year ended 30 June 2020, the Group reclassified end-of-service benefits, which had previously been presented within accruals in trade and other payables. These benefits are for employees in the Middle East, as required by labour laws in certain Middle Eastern countries. The value of these benefits is primarily based on cumulative periods of service and the level of the employees' final basic salaries. The end-of-service benefits are unfunded. The liabilities have been assessed for accounting purposes using the projected unit credit method and individual member data at the reporting date.

The liability recognised in the consolidated statement of financial position is the present value of the defined benefit obligation calculated in accordance with IAS 19 at the end of the reporting period. Estimated future cash outflows are discounted at rates reflecting the market yield of high quality corporate bonds denominated in the currency in which the benefits will be paid and having terms approximating the estimated term of the retirement benefit obligations at the end of the reporting period. Actuarial gains and losses are recognised in full in other comprehensive income in the period in which they arise. Other income and expenses associated with the end-of-service benefit schemes are recognised in the consolidated income statement.

Notes to the financial statements continued

22 Retirement benefits continued

End-of-service benefit schemes continued

Assumptions

	United Arab Emirates	Kingdom of Saudi Arabia	Oman	Qatar	Kuwait
2020					
Discount rate	2.7%	3.0%	7.2%	2.7%	2.7%
Expected rate of increase in salaries	2.7%	3.0%	7.2%	2.7%	2.7%
2019					
Discount rate	3.7%	3.7%	6.0%	3.7%	3.8%
Expected rate of increase in salaries	2.7%	2.8%	5.0%	2.7%	2.8%

Sensitivity analysis

The following table shows the sensitivity of the present value of the end-of-service benefit obligations to changes in each of the individual principal actuarial assumptions:

	2020	2019
	Total obligation increase £m	Total obligation increase £m
0.5% decrease to discount rate	2	2
0.5% increase to salary increases	2	1
0.5% increase to life expectancy	-	-

The figures at 30 June 2020 used in these financial statements assume that the mortality of the employees to whom end-of-service benefits apply will be in line with the published Canadian Pensioners' Mortality ('CPM') 1999 mortality table, with improvement factors as per CPM scale B (2000-2030). The valuation would not be materially affected by using a different table with similar rates of mortality.

End-of-service benefit obligations

The amounts recognised in the Group's statement of financial position and the analysis of the movement in the end-of-service benefit obligation is as follows:

	£m
Fair value at beginning of prior financial year	32
Exchange differences	1
Recognised in the income statement:	
Current service cost	8
Benefits paid	(6)
Fair value at end of prior financial year	35
Recognised in the income statement:	
Current service cost	7
Interest expense	1
Recognised as other comprehensive expense	7
Benefits paid	(6)
Fair value at end of financial year	44

Notes to the financial statements continued

23 Total members' interests

During the financial year, the Executive Board sets the level of interim profit allocations and members' monthly drawings after considering the working capital needs of the Group. The final allocation of profits and distribution to members is made after the annual financial statements are approved. Unallocated profits are included in reserves within equity. To the extent that interim profit allocations exceed drawings, the excess profit is included in the statement of financial position under trade and other payables. Where drawings exceed the allocated profits, the excess is included in trade and other receivables. The same treatment is used for members who retire during the financial year.

Amounts due to (from) members represent allocated profits not yet paid to members and are due within one financial year. In the event of a winding-up, members' reserves rank after unsecured creditors.

24 Commitments under operating leases

As disclosed in note 1, the Group adopted IFRS 16 on 1 July 2019 and has since then recognised lease liabilities on the statement of financial position based on discounted future lease payments. A reconciliation of operating lease commitments at 30 June 2019, as shown below, to the lease liabilities recognised on adoption of IFRS 16 is presented in note 1. A maturity analysis of the leases in lease liabilities at 30 June 2020 is presented in note 8.

The Group's total commitments under non-cancellable operating leases, together with the obligations by maturity, were as follows at 30 June 2019:

	2019		
	Land and buildings £m	Other assets £m	Total £m
Within one financial year	65	3	68
1–2 financial years	65	2	67
2–3 financial years	65	1	66
3–4 financial years	63	–	63
4–5 financial years	62	–	62
More than five financial years	454	–	454
Operating lease commitments at 30 June 2019 (note 1)	774	6	780

Notes to the financial statements continued

25 Financial instruments

Financial instruments are initially measured at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Derivatives, such as forward foreign-exchange contracts and interest rate swaps, are held or issued in order to manage the Group's currency and interest rate risks arising from its operations and sources of finance. Hedge accounting is applied where the relevant criteria are met. The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income or expense within the statement of comprehensive income. The gain or loss relating to any ineffective portion is recognised immediately in the income statement. Amounts accumulated in equity are reclassified to profit or loss in the financial periods when the hedged item affects profit or loss, for example when the forecast sale that is hedged takes place.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

Financial risk management and management of capital

The Group's objectives when managing capital are to safeguard the Group's ability to operate as a going concern and to maintain an optimal capital structure to cover the expected peak cash requirements of the business. The Group's capital sources primarily comprise members' capital, undistributed profits and borrowing facilities. The Group holds or issues financial instruments in order to finance its operations and manage foreign currency and interest rate risks arising from its operations and sources of finance. The principal financial instruments, other than derivatives, held or issued by the Group are:

- Other investments (note 12) – investments held at amortised cost, comprising reservoir trust restricted assets, subordinated loan notes and preference shares from entities in the PwC global network; and investments held at fair value through profit and loss, comprising equity holdings and preference shares in entities in the PwC global network.
- Trade and other receivables (note 13) – primarily trade receivables, in respect of services provided to clients, for which payment has not yet been received.
- Cash and cash equivalents (note 14) – the Group manages its cash resources in order to meet its daily working capital requirements. Cash and any outstanding debt are kept to a minimum and liquid fund deposits are maximised.
- Trade and other payables (note 15) – primarily trade payables and accruals in respect of services received from suppliers, for which payment has not yet been made.
- Borrowings (note 16) – primarily amounts drawn down under the Group's facility arrangements.
- Lease liabilities (note 8) – the present value of the Group's expected future lease payments for the underlying right-of-use assets during the lease term.
- Provisions (note 18) – comprising the Group's annuities.
- Members' capital (note 19) – the Group requires members to provide long-term financing, which is classified as a liability.
- Other non-current liabilities (note 20) – comprising capital loans provided by non-controlling interest partners in subsidiary undertakings consolidated into the Group, primarily in relation to the Middle East.

The Executive Board determines the treasury policies of the Group. These policies, designed to manage risk, relate to specific risk areas that management wish to control, including liquidity, credit, interest rate and foreign currency exposures. Hedging is undertaken against specific exposures to reduce risk and no speculative trading is permitted. The Group's hedges are in respect of foreign currency risk and interest rate risk.

	20	(4)	(392)	20	(2)	(166)

When measuring the fair value of an asset or liability, the Group uses observable inputs where possible. The inputs to valuations used to measure fair values are categorised into different levels in a fair value hierarchy as follows:

- Level 1 – using quoted prices in active markets for identical assets and liabilities.
- Level 2 – using observable inputs other than quoted prices in active markets.
- Level 3 – using inputs that are not based on observable market data, such as internal models or other valuation methods.

Fair value through profit and loss investments (note 12) include:

- £16m (2019: £16m) of other investments measured at fair value using unobservable inputs (level 3), comprising interest-bearing preference shares issued by entities in the PwC global network.
- £4m (2019: £4m) of other investments measured at fair value using unobservable inputs (level 3), comprising investments in a number of entities in the PwC global network.

The fair values of all derivatives are based on observable inputs (level 2).

There have been no transfers of any financial assets and liabilities between levels 1, 2 and 3 during the current or prior financial year.

For other financial assets and liabilities, fair value approximates their carrying value in the current and prior financial year.

Notes to the financial statements continued

25 Financial instruments continued

Liquidity risk

The Group's most significant treasury exposures relate to liquidity. The Group manages the risk of uncertainty in its funding operations by spreading the maturity profile of its borrowings and deposits, taking into account expected cash receipts and payments, and arranging committed facilities to provide a minimum headroom of 25% of forecast peak borrowing levels. The Group's facilities at 30 June 2020, totalling £695m (2019: £618m), were predominantly held with nine leading international banks, with £263m of facilities due to expire within one financial year, £351m between one and three financial years, and £81m within five financial years. Since the financial year end, £25m of the facilities due to expire within one financial year have been renewed, on satisfactory terms, for a further full year. On 3 August 2020, an existing £25m facility was cancelled and an additional £200m committed facility was obtained by the Group, due to expire within two financial years, bringing the Group's total facilities to £870m.

Credit risk

Cash deposits and other financial instruments with banks and other financial institutions give rise to counterparty risk. The Group manages this risk by reviewing counterparties' credit ratings regularly and limiting the aggregate amount and duration of exposure to any one counterparty, taking into account criteria such as credit rating, market capitalisation and relative credit default swap price. The minimum long-term credit rating of all banks and financial institutions who held the Group's short-term deposits during the financial year ended 30 June 2020 was BBB+.

The Group's other significant credit risk relates to receivables from clients. Exposure to this risk is monitored on a routine basis and credit evaluations are performed on clients as appropriate. The Group's exposure is influenced mainly by the individual characteristics of each client. Risk is managed by maintaining close contact with clients and by routine billing and cash collection for work performed.

Interest rate risk

The Group's borrowings and any surplus cash balances are held at variable interest rates linked to London Interbank Offered Rate ('LIBOR'). A portion of the Group's recurring borrowings, arising primarily from the operations of PricewaterhouseCoopers (Middle East Group) Limited and its subsidiaries, are partially swapped to a fixed rate through the use of interest rate swap agreements. The durations of the swap agreements match the duration payable of the debt instruments. The majority of the Group's long-term borrowings are subject to fixed US dollar interest rates after applying the impact of these hedging instruments. Outstanding borrowings at 30 June 2020 are primarily denominated in US dollars, reflecting the composition of the Group's assets that are funded by the borrowings. A movement of 50 basis points in the interest rate on borrowings and surplus cash balances through the financial year would not have had a material impact on the pre-tax profits of the Group.

Foreign currency risk

The majority of the Group's income and expenditure is in sterling, with the exception of the operations of PricewaterhouseCoopers (Middle East Group) Limited and its subsidiaries which are primarily denominated in US dollars/US dollar linked currencies. Refer to note 10 for summarised consolidated financial information for PricewaterhouseCoopers (Middle East Group) Limited.

Other fees and costs denominated in foreign currencies are mainly in connection with professional indemnity insurance and transactions with PwC network firms. The Group seeks to minimise its exposure to fluctuations in exchange rates by hedging against foreign currency exposures. These hedges are designated as cash flow hedges where this is deemed necessary and the relevant criteria are met. The Group's policy is to enter into appropriate forward or derivative transactions after a net economic exposure has been identified.

Notes to the financial statements continued

25 Financial instruments continued

Derivative financial instruments

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument. The Group performs an assessment of effectiveness and if the critical terms of the hedging instrument no longer match with the terms of the hedged item, the Group uses the hypothetical derivative method to assess effectiveness.

Foreign-exchange derivative contracts all mature in less than two years and are valued using market prices prevailing at the reporting date. The foreign currency forwards and options are denominated in the same currency as the highly probable future payments, therefore achieving a hedge ratio of 1:1. There was no ineffective portion recognised in the income statement for the financial year ended 30 June 2020 (2019: nil) in respect of these foreign-exchange derivative contracts and there was no effective portion of cash flow hedges recognised as other comprehensive income for the financial year ended 30 June 2020 (2019: nil). The carrying value of foreign-exchange derivative contracts at 30 June 2020 was nil (2019: nil) and the notional principal amount of foreign-exchange derivative contracts at 30 June 2020 was £112m (2019: £74m).

Interest rate swaps mature in the financial year ending 30 June 2024, and have been valued using the interest rates prevailing at the reporting date. The durations of the swap agreements match the duration of the debt instruments, therefore achieving a hedge ratio of 1:1. There was no ineffective portion recognised in the income statement for the financial year ended 30 June 2020 (2019: nil) in respect of these swap agreements. The effective portion of cash flow hedges recognised as other comprehensive expense for the financial year ended 30 June 2020 was £2m (2019: £2m). The carrying value of interest rate swaps at 30 June 2020 was a £4m liability (2019: £2m) and the notional principal amount of interest rate swap derivative contracts at 30 June 2020 was £40m (2019: £39m).

Interest rate profile of financial assets and liabilities

Group short-term deposits with banks of £455m (2019: £246m) and Group borrowings of £83m (2019: £47m) are subject to floating interest rates. LLP short-term deposits with banks of £383m (2019: £246m) are also subject to floating interest rates. Group investments include floating rate subordinated loan notes of £33m (2019: £41m) and fixed rate preference shares of £26m (2019: £27m). LLP investments include floating rate subordinated loan notes of £6m (2019: £6m) and fixed rate preference shares of £11m (2019: £12m).

26 Related party transactions

The LLP and the PricewaterhouseCoopers United Kingdom Partnership ('United Kingdom Partnership') are related parties because they are both controlled by the same group of individuals. This controlling group of individuals consists of all the members of the LLP, who are also all the members of the United Kingdom Partnership. Related party transactions with the United Kingdom Partnership and other related parties are summarised below.

Services provided to PricewaterhouseCoopers United Kingdom Partnership in respect of client assignments

Arrangements are in place for the LLP to supply services to the United Kingdom Partnership in connection with certain client assignments. For the financial year ended 30 June 2020, the LLP provided services to the United Kingdom Partnership to the value of £110,000 (2019: £127,000) under these arrangements. There were no balances outstanding at 30 June 2020 in respect of these services (2019: nil).

Administrative support to PricewaterhouseCoopers United Kingdom Partnership

On behalf of its members, the LLP provides certain administrative services to support the United Kingdom Partnership, including the calculation of annuities and paying agent arrangements in connection with the pension annuities and certain other post-retirement payments due to certain former partners of that partnership. The LLP charged the United Kingdom Partnership £200,000 (2019: £200,000) for these support services for the financial year ended 30 June 2020. At 30 June 2020, balances due to the LLP from the United Kingdom Partnership amounted to £9m (2019: nil). Amounts paid during the financial year ended 30 June 2020 to the annuitants, on behalf of the continuing members in their capacity as partners of the United Kingdom Partnership, totalled £99m (2019: £100m).

Group transactions with joint ventures and associates

Details of the Group's interests in joint ventures and associates are provided in note 11.

The transactions during the financial year with these related parties were as follows:

	2020 £m	2019 £m
Capital investment in		
PwC Poland Services Limited	1	2
Subscription of preference shares in

The LLP is incorporated in England and Wales.

The registered office of PricewaterhouseCoopers LLP is 1 Embankment Place, London, WC2N 6RH.

Energy and carbon reporting for the financial year ended 30 June 2020

In accordance with the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018, the members present their energy and carbon report of PricewaterhouseCoopers LLP ('the LLP') and its subsidiary undertakings domiciled in the United Kingdom ('UK') (together 'the UK Group') for the financial year ended 30 June 2020.

Methodologies used

The Greenhouse Gas ('GHG') protocol, UK Government environmental reporting guidelines, and UK Government emission factors have been used to calculate the GHG footprint in this report.

Commitment to responsible energy management

Managing energy consumption responsibly has been a key pillar of the UK Group's commitment to becoming a low carbon business for several years.

Since 2007⁽¹⁾, the UK Group has reduced energy consumption by 60% and carbon emissions associated with energy by 94%. In 2020, 80% of total energy consumption was from renewable sources⁽²⁾, and all residual emissions were offset⁽³⁾ through purchasing carbon credits. Information on targets, programmes and performance can be found in the UK Group's annual non-financial scorecard⁽⁴⁾ ('non-financial scorecard') and on the energy page⁽⁵⁾ of the UK Group's website.

2020 progress

The UK Group's energy programme spans all our UK offices (21 at 30 June 2020) and focuses on consolidating and refreshing office space, operating more efficiently, and investing in new technology.

During the financial year ended 30 June 2020, a new office opened in Birmingham. This benefits from a number of technologies to reduce energy consumption, such as a digital addressable lighting interface ('DALI') system which incorporates natural light, LED lighting, and smart sensors, and an enhanced building management system ('iBMS') which allows greater operational insight and control. These improvements reduced electricity consumption in the Birmingham office by 34% in the first six months of operation compared to the comparable period in the previous office space.

In the More London office, the UK Group also started to run new trigenerators on 100% biogas. These provide 25% of the electricity demand in that office, and use any waste heat produced to regulate the office temperature. Additionally, a first phase of photovoltaics was installed to further reduce reliance on the grid.

Management and standards

The UK Group's environmental management system has been certified to the International Standards Organisation ('ISO') 14001 standard since 2008, and ISO 50001 energy standard since 2012.

During the financial year ended 30 June 2020, both ISO 14001 and ISO 50001 certifications were renewed, and an Energy Savings Opportunity Scheme ('ESOS') assessment was undertaken resulting in no additional recommendations. Additionally, the Carbon Trust Standard for Carbon, which has been held since 2009, was renewed, and Level 3 of the Carbon Trust Standard for Supply Chain was attained for the first time.

About this disclosure

These metrics focus on the consumption of energy and the associated carbon emissions in the financial year ended 30 June 2020. Emissions from other sources are reported in the non-financial scorecard⁽⁴⁾, which is derived from the same data as this report.

(1) 2007 is the reference year for the UK Group's current environmental targets.

(2) Based on tariffs using Renewable Energy Guarantees of Origin ('REGOs') and Renewable Gas Guarantees of Origin ('RGGOs').

(3) Each financial year the UK Group offset 100% of the extended carbon footprint as reported in the non-financial scorecard. All offsets are Verified Carbon Standard ('VCS') and from REDD+ projects. Retired on behalf of PwC by a registered broker.

(4) www.pwc.co.uk/annualreport/assets/2020/pdf/pwc-uk-non-financial-performance-scorecard-2020.pdf.

(5) www.pwc.co.uk/who-we-are/our-purpose/low-carbon-circular-business/energy.html.

Energy and carbon reporting continued

Energy consumption and related carbon emissions

	Units	2020	2019
Energy consumption			
Total Streamlined Energy and Carbon Report energy consumption	Million kWh	42	49
Gas (natural and biogas)	Million kWh	10	9
Biodiesel	Million kWh	1	5
Electricity	Million kWh	22	24
Business travel: road ⁽⁶⁾	Million kWh	9	11
Carbon emissions ^(7, 8)			
Total emissions (Scope 1, 2 and 3)	Tonnes CO ₂ e	9,156	11,297
Total emissions intensity (Scope 1, 2 and 3)	Tonnes CO ₂ e/£m revenue	2.63	3.27
Scope 1			
Gas (natural and biogas)	Tonnes CO ₂ e	636	686
Biodiesel	Tonnes CO ₂ e	3	19
Fuel for transport purposes	Tonnes CO ₂ e	-	-
Scope 2			
Electricity – location based ⁽⁹⁾	Tonnes CO ₂ e	5,696	6,879
Scope 3			
Business travel: road	Tonnes CO ₂ e	2,821	3,713
Carbon emission offset	Percentage	100%	100%

The energy and carbon report on pages 59 to 60 was authorised for issue and signed on 12 August 2020 on behalf of the members of PricewaterhouseCoopers LLP, registered number OC303525, by:

Warwick Hunt
Managing Partner and Chief Operating Officer
 Designated member

A complete list of the members can be found on the Companies House register.

(6) Business travel based on car mileage claimed through expenses, converted to kWh using UK Government GHG conversion factors.

(7) Calculated using UK Government GHG conversion factors for company reporting (May 2019). The scope of this Streamlined Energy and Carbon Report disclosure does not include some Scope 3 emissions which are reported in the non-financial scorecard.

(8) Total emissions calculated using 'Location Based' method. 2020 total emissions using the 'Market Based' method which allows lower emissions for renewable electricity are 4,550 tonnes CO₂e with intensity of 1.31 tonnes CO₂e/£m revenue.

(9) 2020 electricity emissions using the 'Market Based' calculation method: 1,090 tonnes CO₂e.
